

# Sheth L.U.J. And Sir M.V. College

Aim:- Creating Interactive Dashboards and Data Stories

Step 1:- Open Tableau And Connect The Dataset

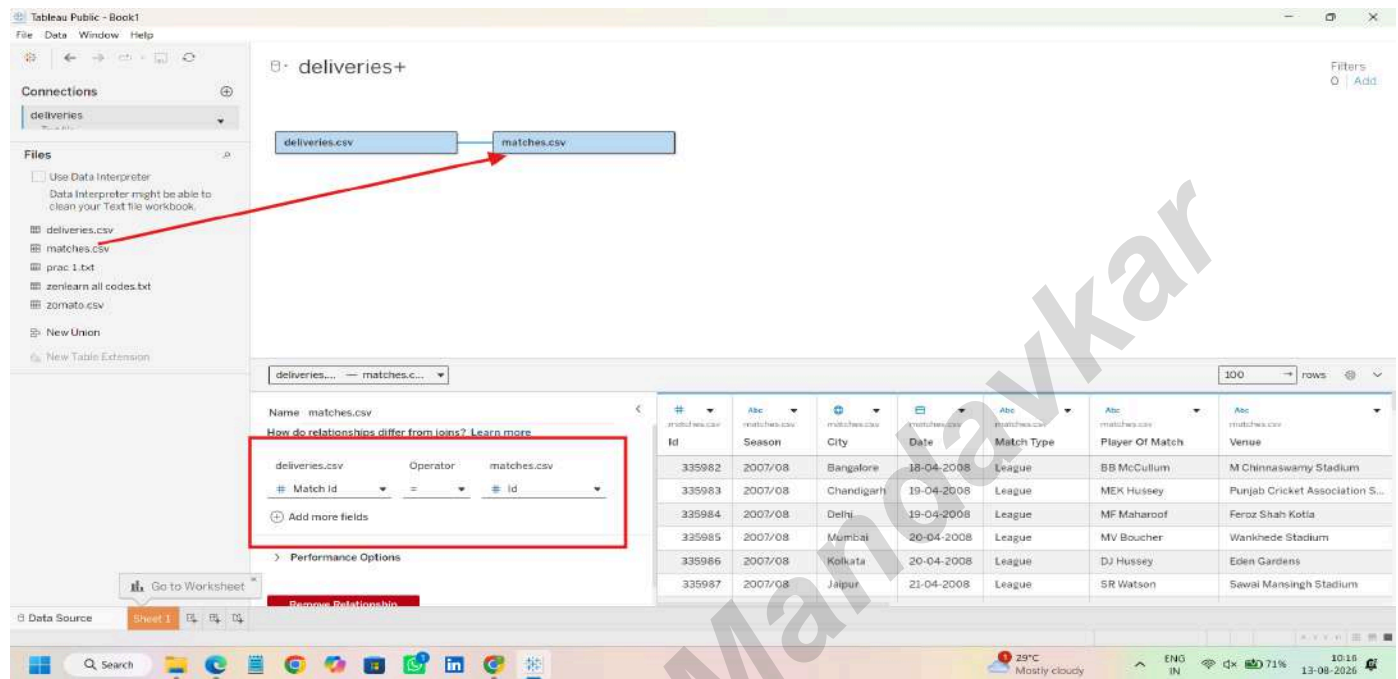

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

## Step 2:- Connect The matches.csv To deliveries.csv And Select The match\_id in relationship

## A: Design a basic dashboard layout using sheets

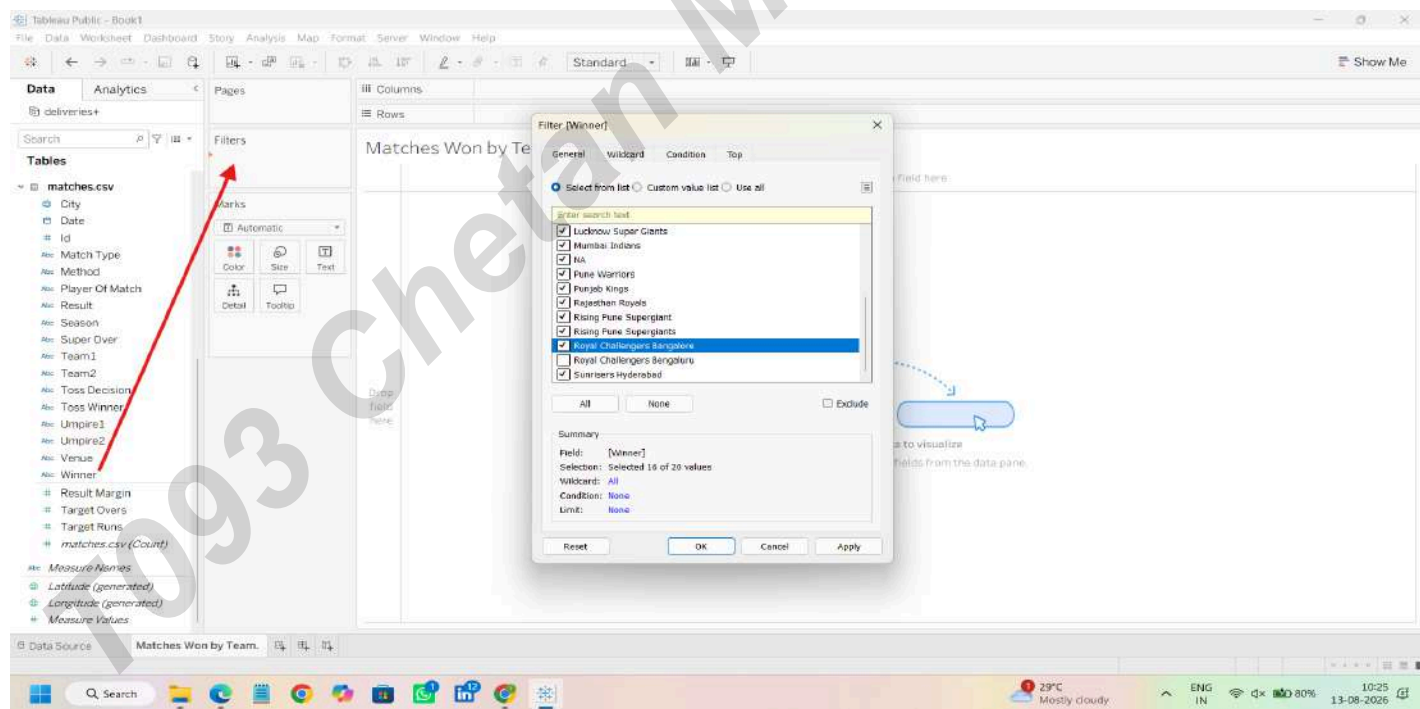

Step 1:- Open a new worksheet and rename it: Matches Won by Team.  
Drag Winner from Dimensions to the Rows shelf.  
o Quick Filter: Drag Winner to the Filters shelf and uncheck Null (to clear matches with no result/abandoned).

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

The screenshot shows the Tableau Public interface. In the 'Columns' shelf, the text 'Matches Won by Team.' is entered. A red arrow points from the 'Winner' field in the 'Data Source' pane to the 'Matches Won by Team.' field in the 'Columns' shelf. The 'Data Source' pane shows a table named 'matches.csv' with fields like City, Date, Id, Match Type, Method, Player Of Match, Result, Season, Super Over, Team1, Team2, Toss Decision, Toss Winner, Umpire1, Umpire2, Venue, Winner, Result Margin, Target Overs, Target Runs, and matches.csv (Count). The 'Measure Names' section shows Latitude (generated), Longitude (generated), and Measure Values.

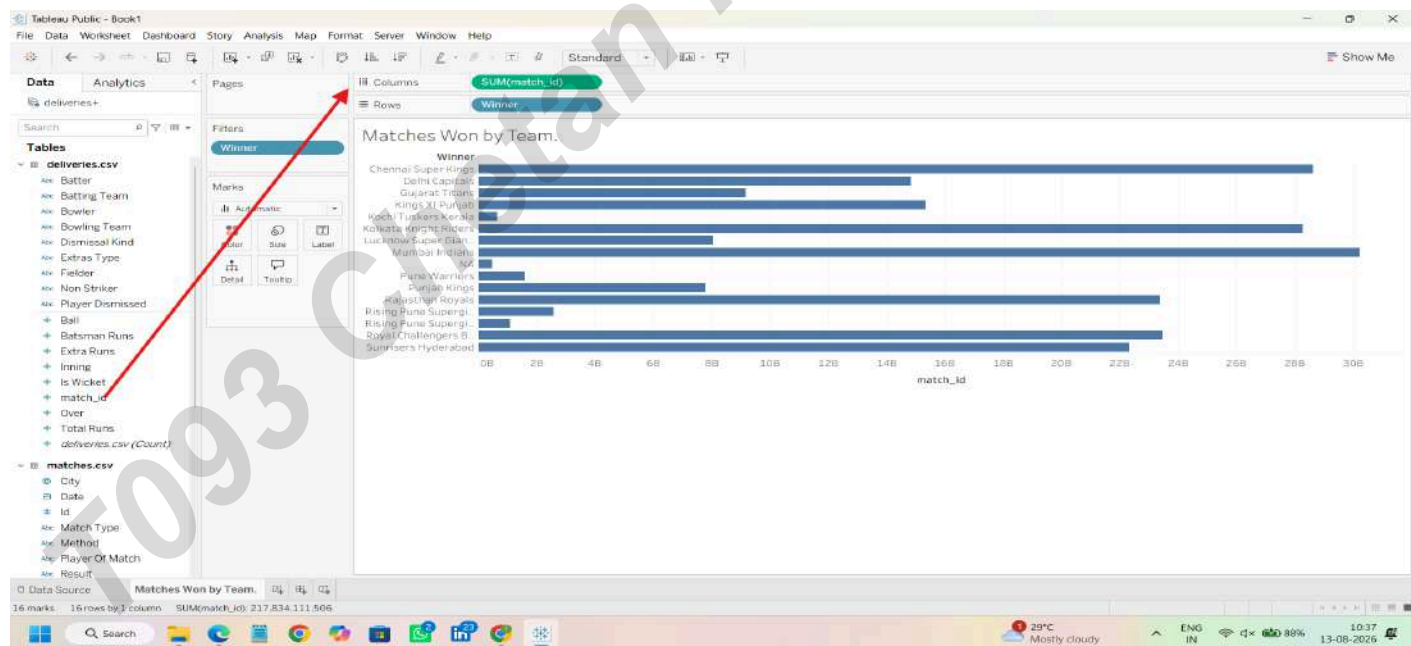

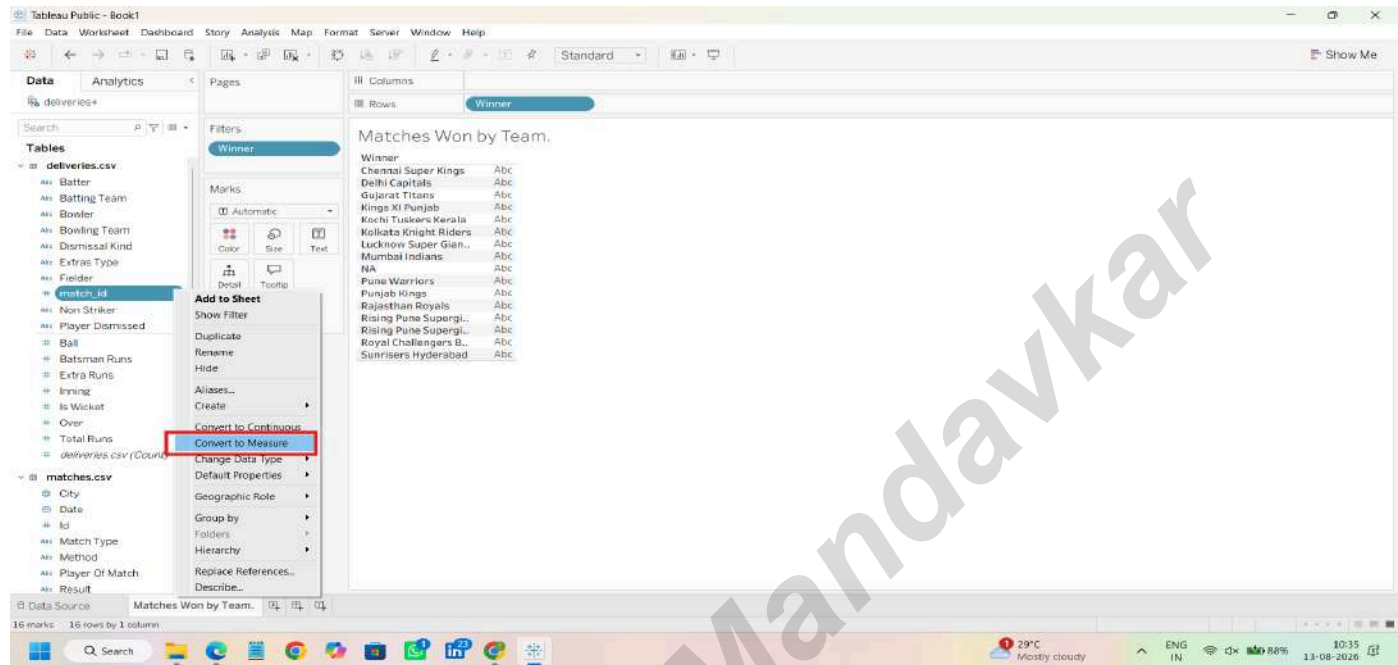

Roll No. T093

# Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 2:- Convert The Match Id Column Into Measure And Drag Matches (Count) to the Columns shelf.**

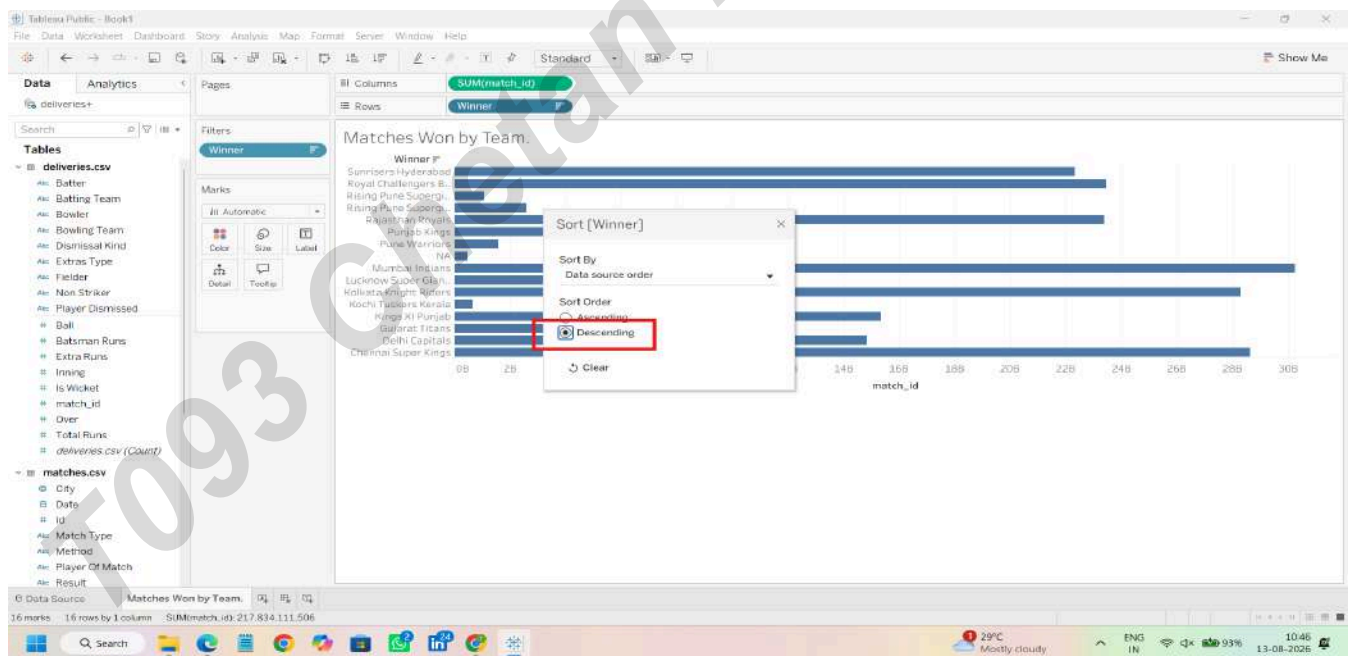

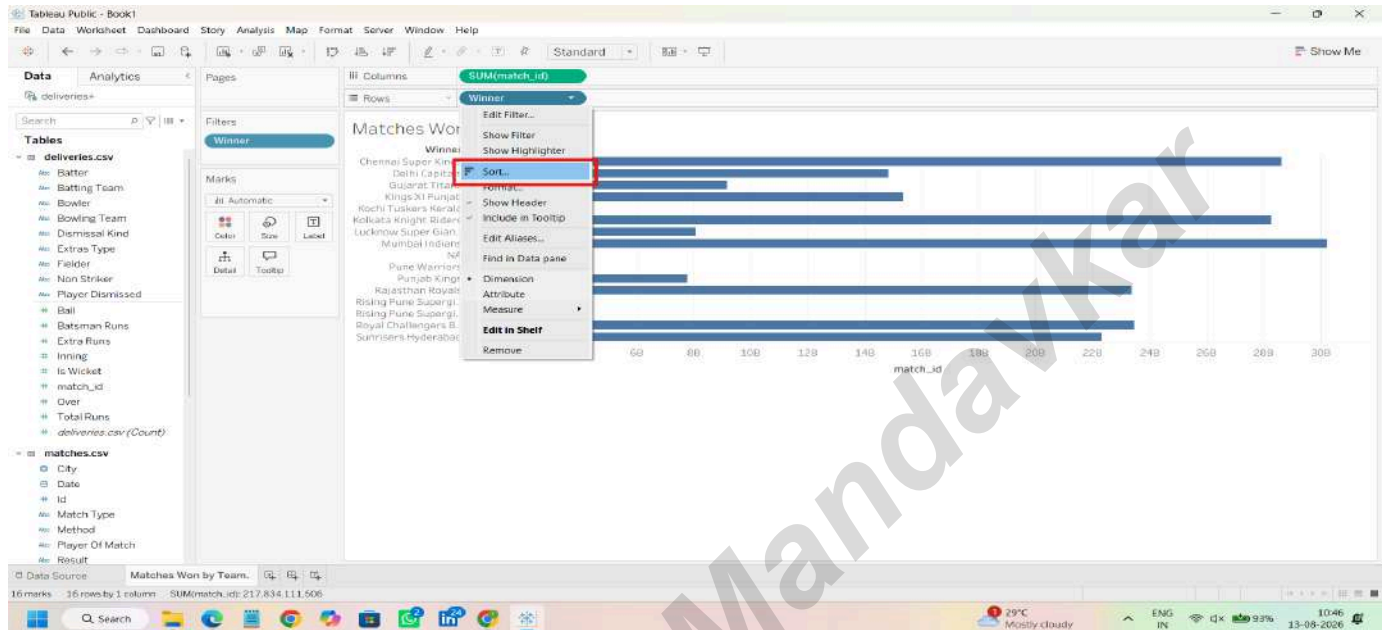

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 3:-Right Click On The Winner Field And Click On Sort Descending so the team with the most wins (e.g., Mumbai Indians) appears at the top.**

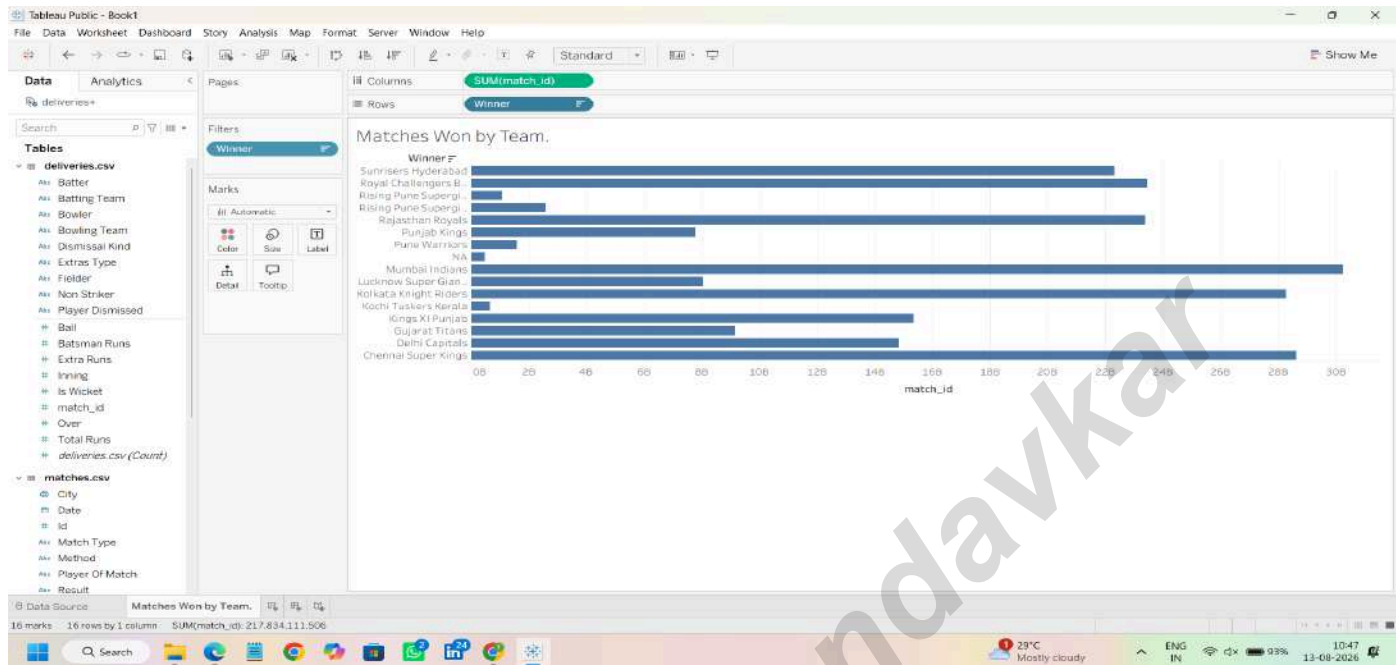

Name:- Chetan Mandavkar

Roll No. T093

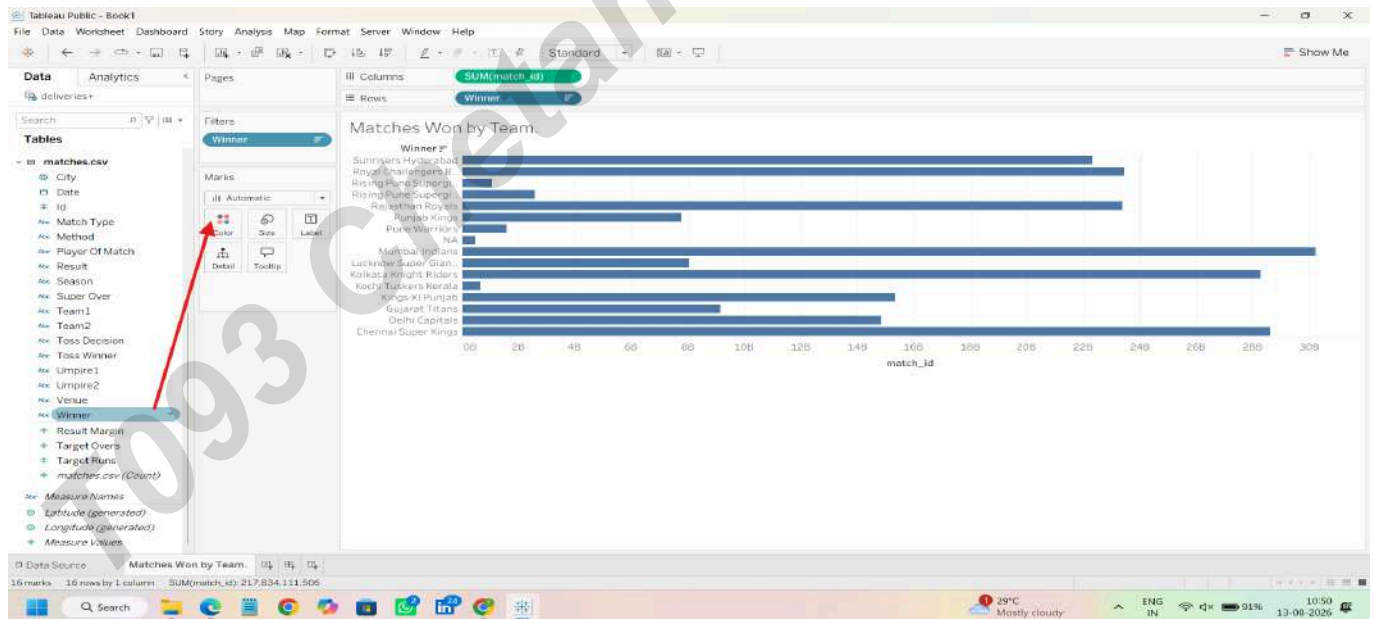

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 4:- Drag Winner to Color on the Marks card to give each team its distinct color. Click Label on the Marks card Check Show mark labels.**

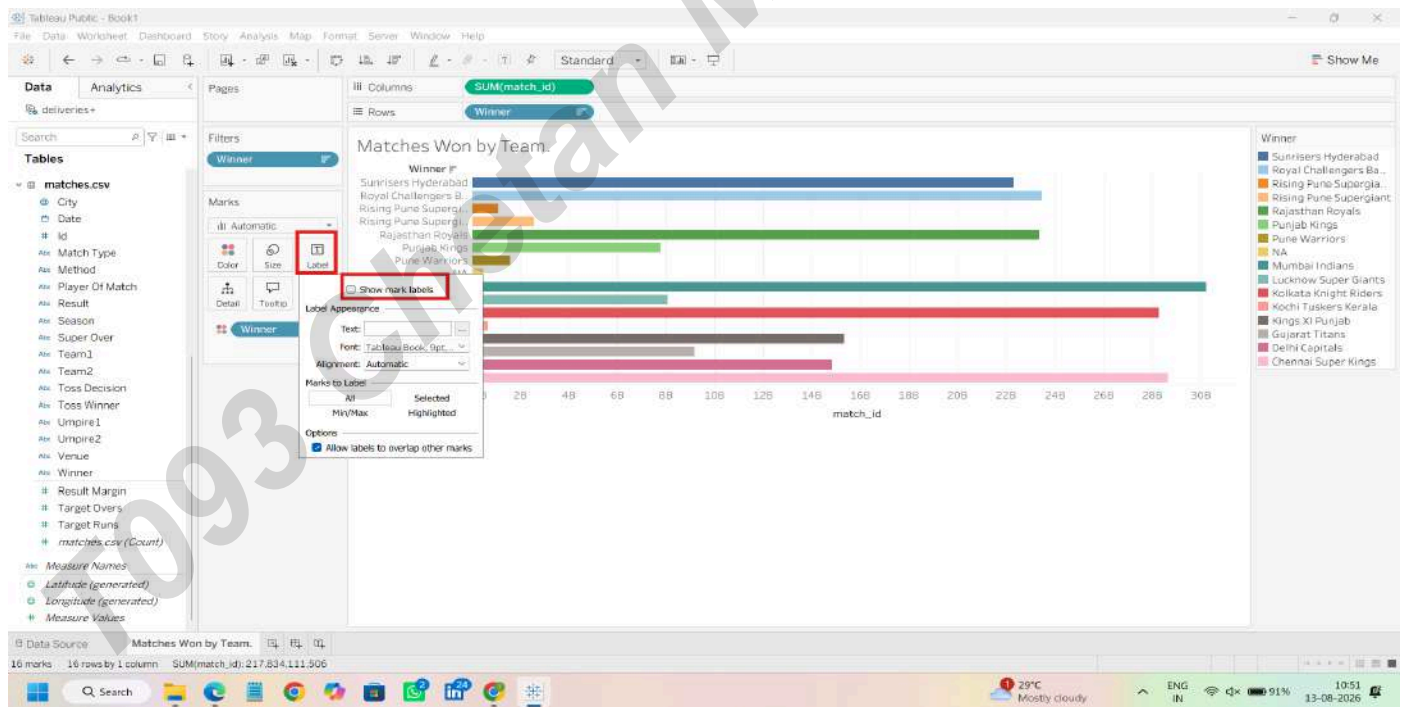

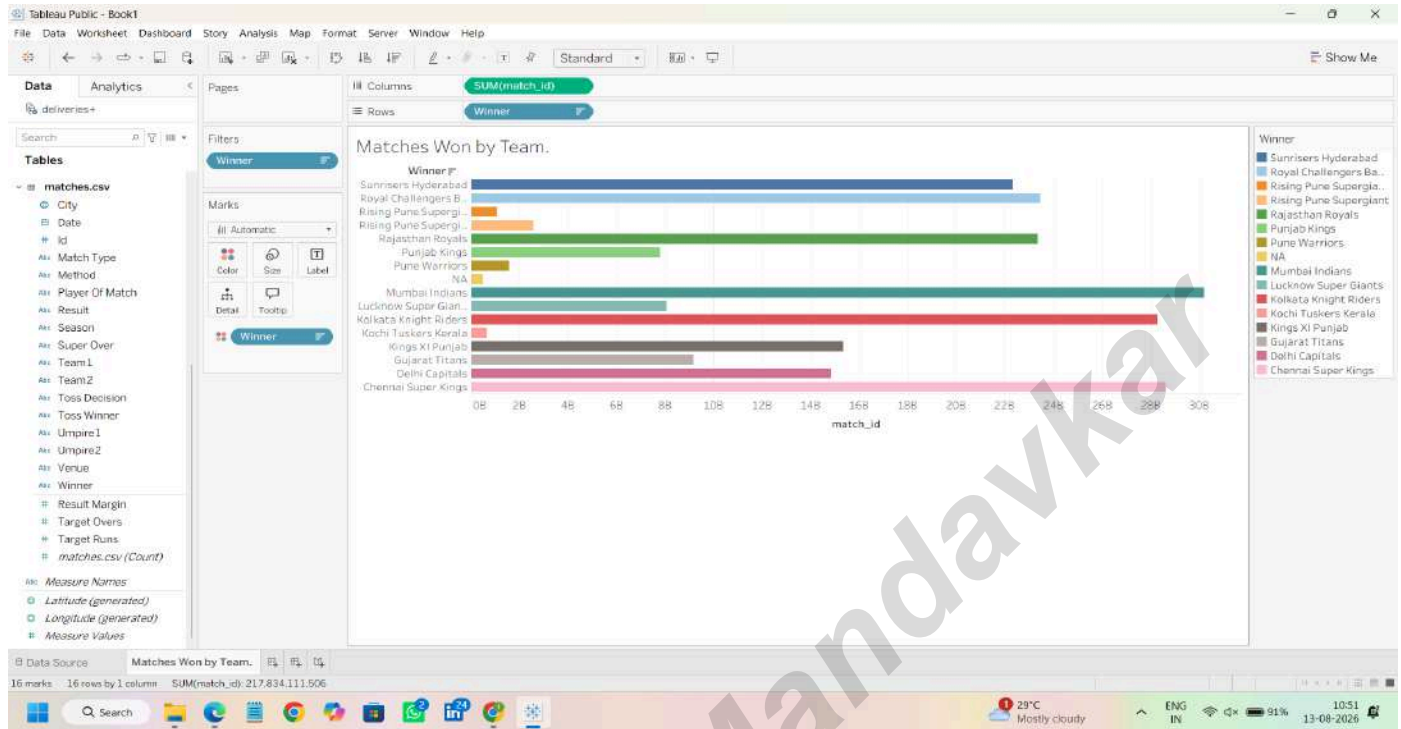

**Name:- Chetan Mandavkar**

Tableau

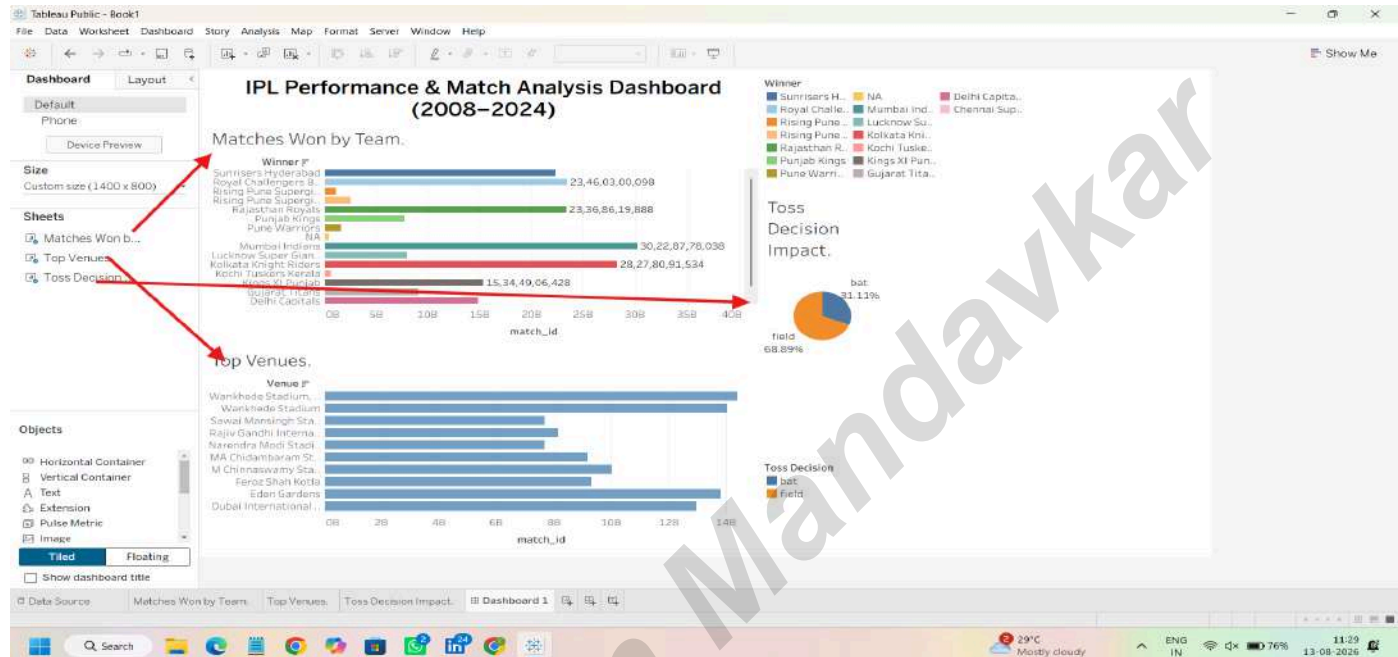

# Sheth L.U.J. And Sir M.V. College

**Step 13:- Drag your three sheets into the layout:**

**Drag Matches Won by Team into the top/left area.**

**Drag Top Venues next to or below it.**

**Drag Toss Decision Impact to the side panel.**

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

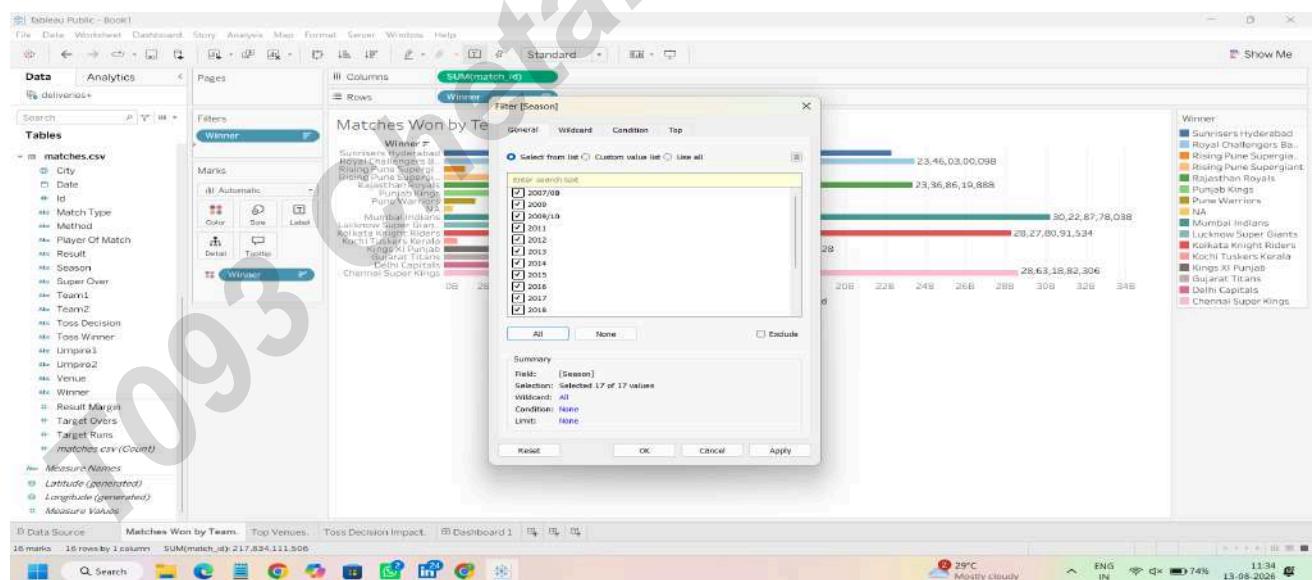

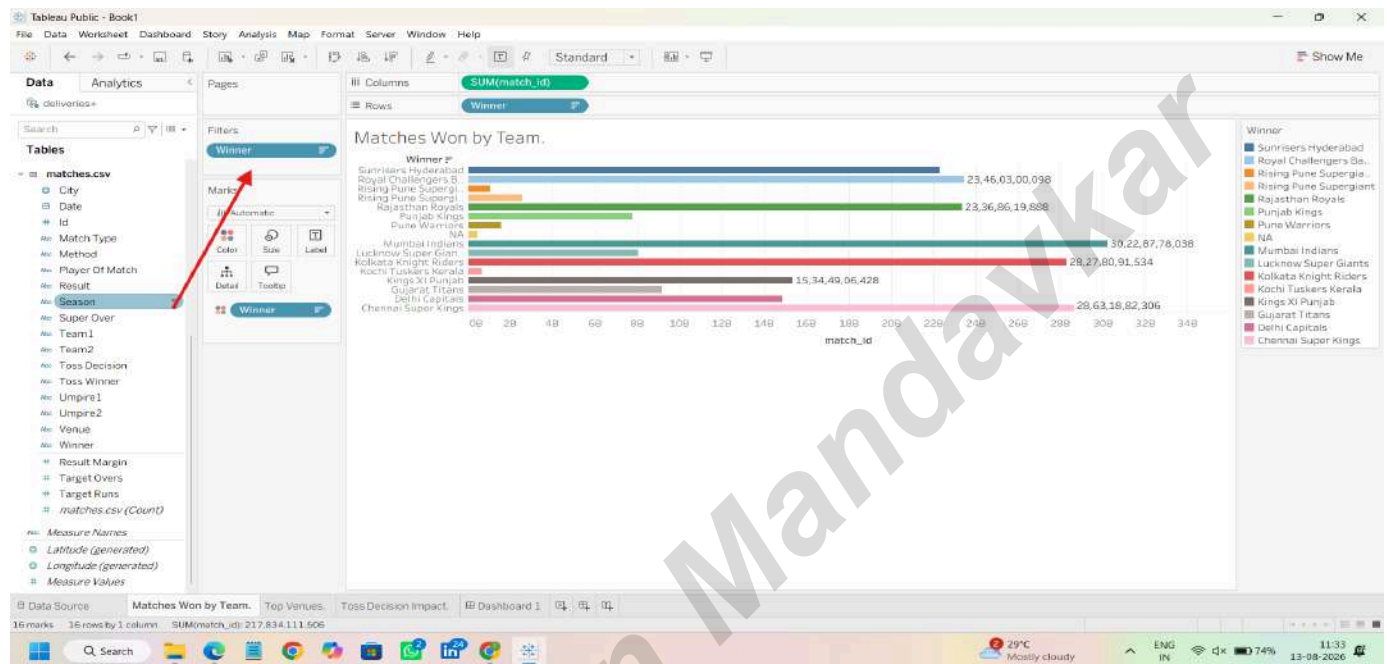

# Sheth L.U.J. And Sir M.V. College

## B: Add filters and interactive controls

Step 1:- Go back to your Matches Won by Team worksheet.

Drag Season from the Data pane onto the Filters card.

Select All and click OK.

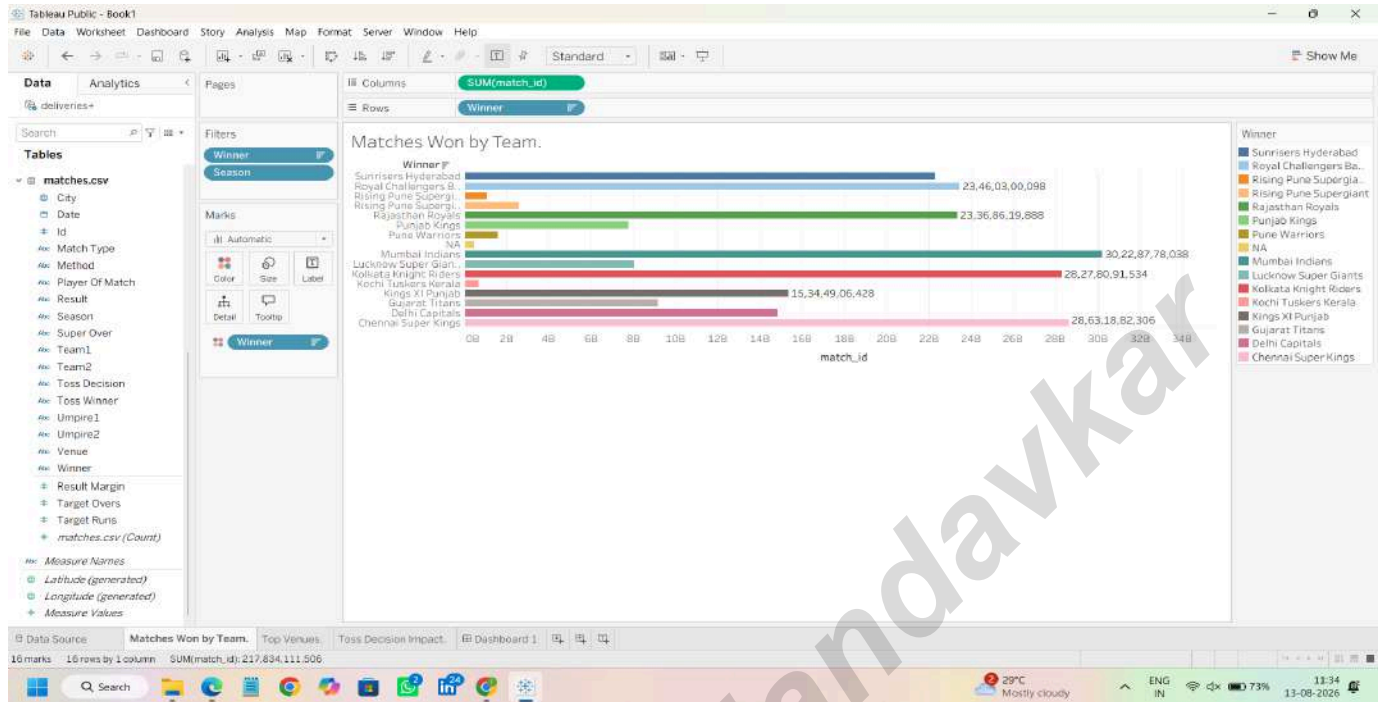

Name:- Chetan Mandavkar

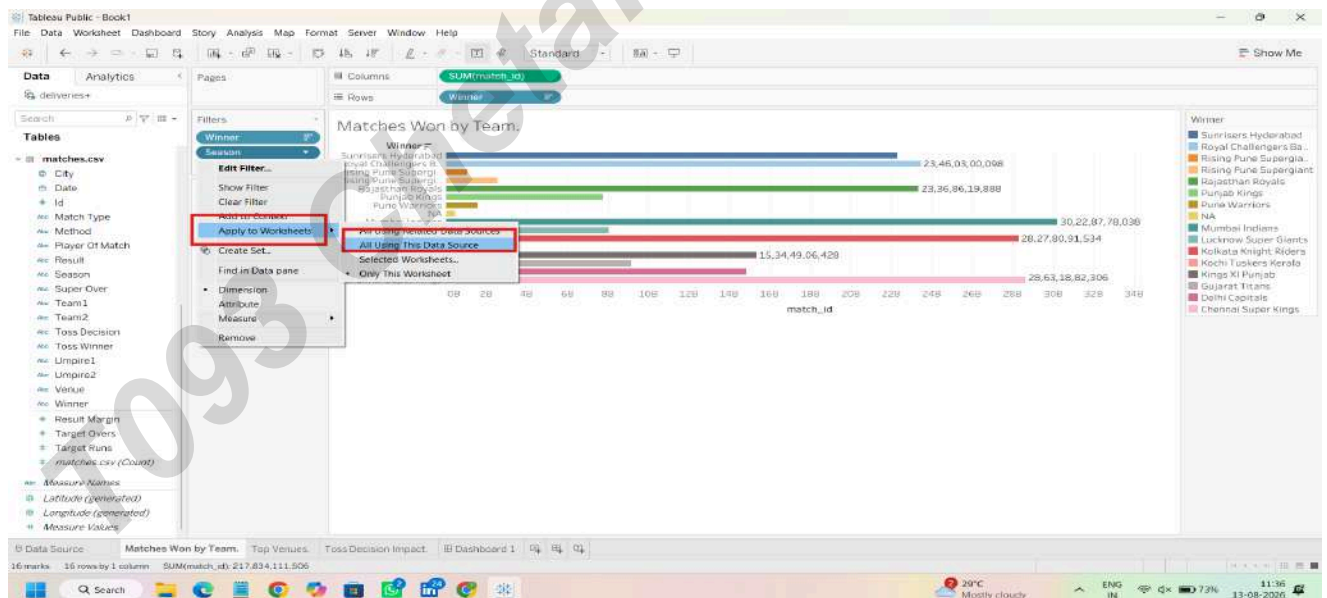

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 2:- Right-click the Season pill on the Filters card and select Apply to Worksheets All Using This Data Source (This ensures changing the season updates all dashboard charts simultaneously).**

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

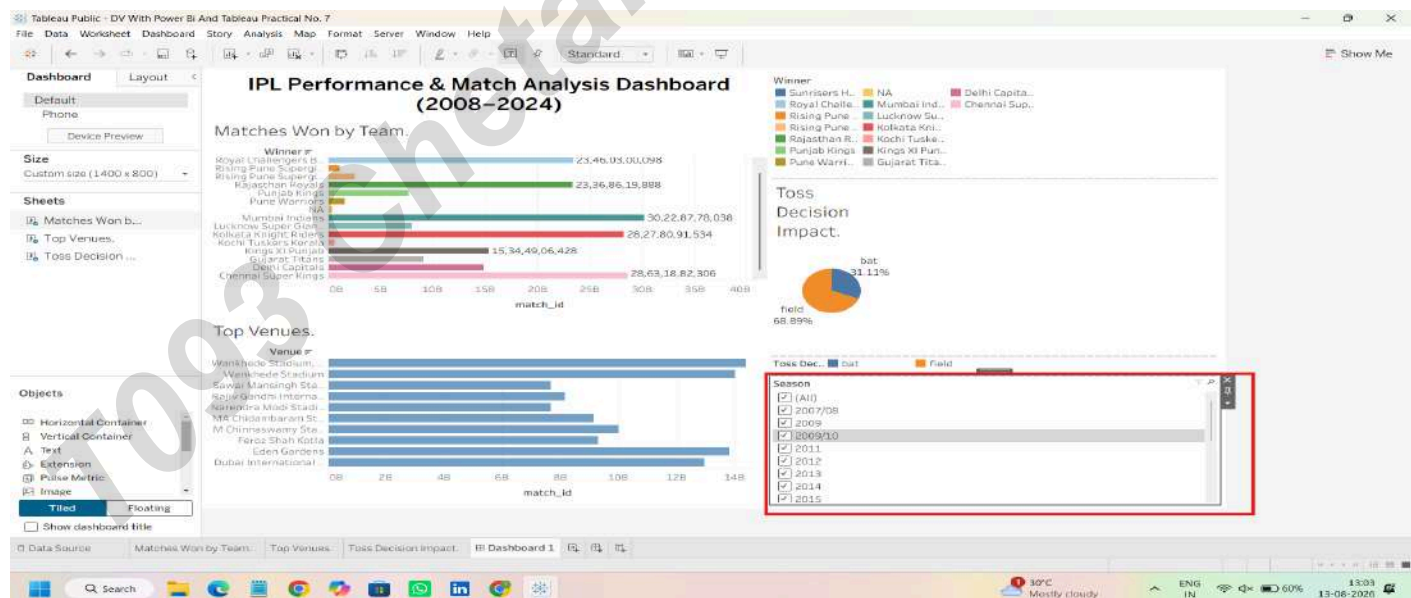

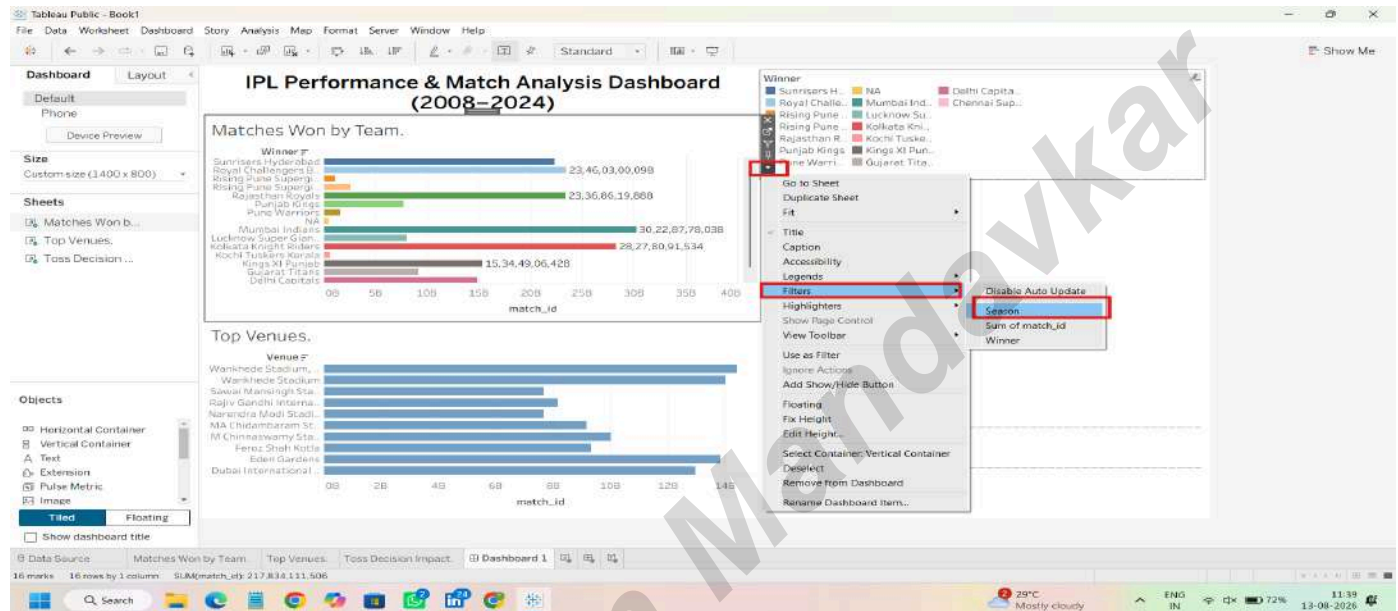

# Sheth L.U.J. And Sir M.V. College

**Step 3:- Switch back to your main Dashboard tab.**

**Click on the Matches Won by Team chart box to select it.**

**Click the small More Options drop-down arrow in the top-right corner of the chart outline box. Go to Filters select Season.**

**The Season filter box will appear on your right sidebar.**

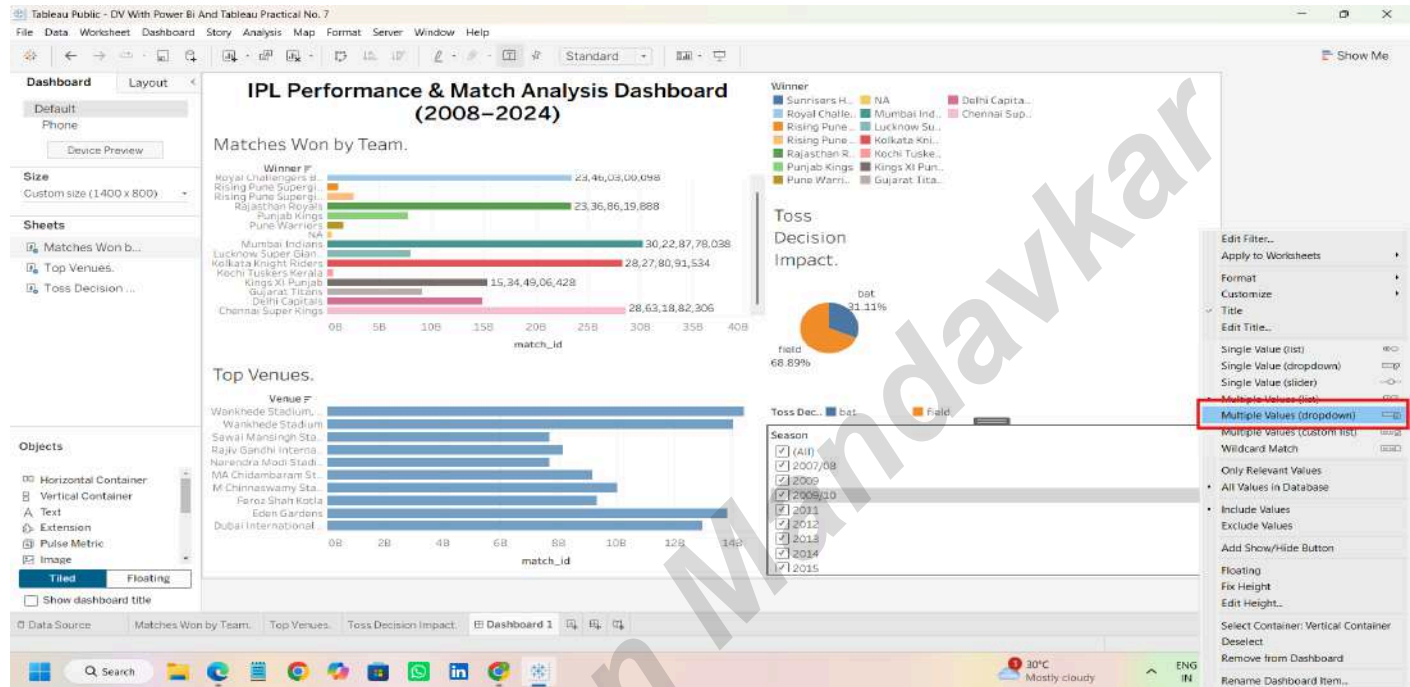

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**Step 4:- Click the drop-down arrow on the top right of the new Season filter container box on your dashboard. Change the filter style to Multiple Values (Dropdown) or Wildcard Match / Single Value List (Dropdown keeps the dashboard clean)**

**Step 5:- Repeat the process to add two more interactive filters:**

- o Click once anywhere inside your Matches Won By Team bar chart. A gray border will appear around it, indicating it is selected.
- o Click the downward-pointing triangle (More Options) located on the top right edge of that gray border.
- o Hover over Filters in the menu and select Match Type. (Note: If it is not listed, you will need to navigate back to your "Matches Won By Team" worksheet, drag Match Type to the Filters shelf there, and then return to your dashboard).

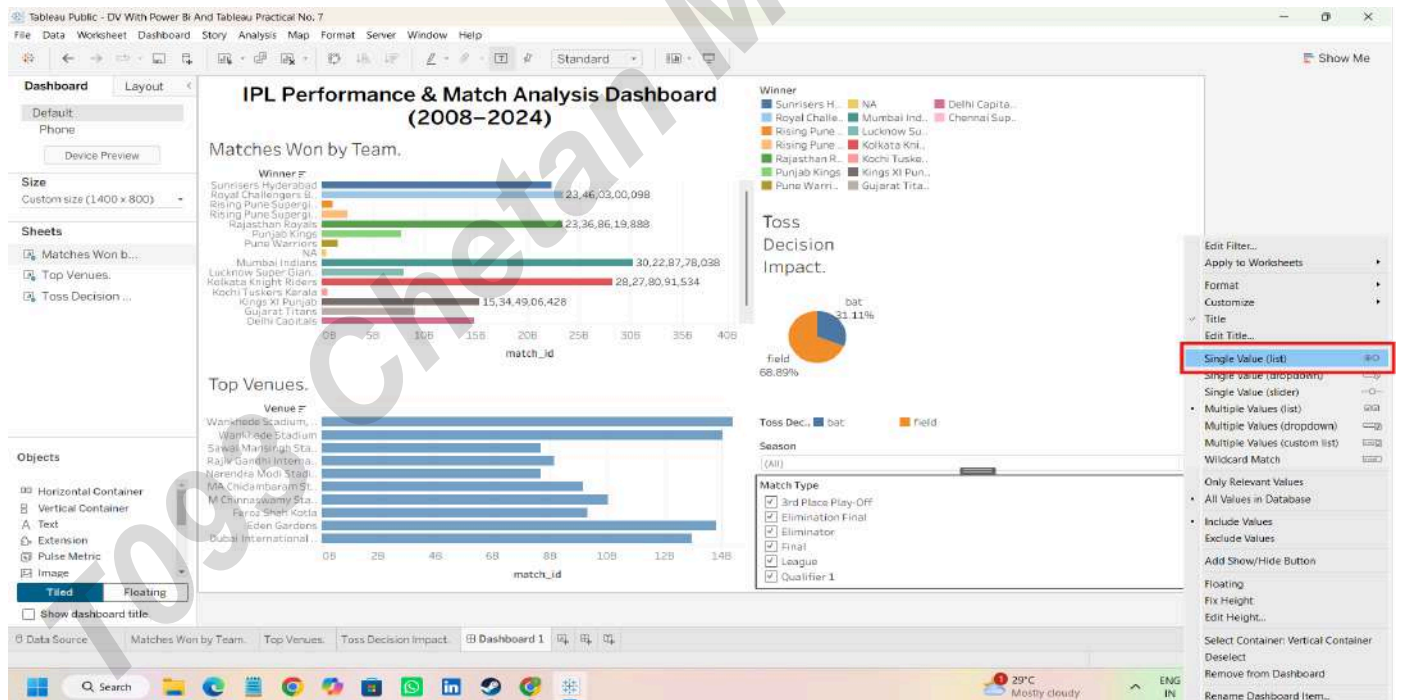

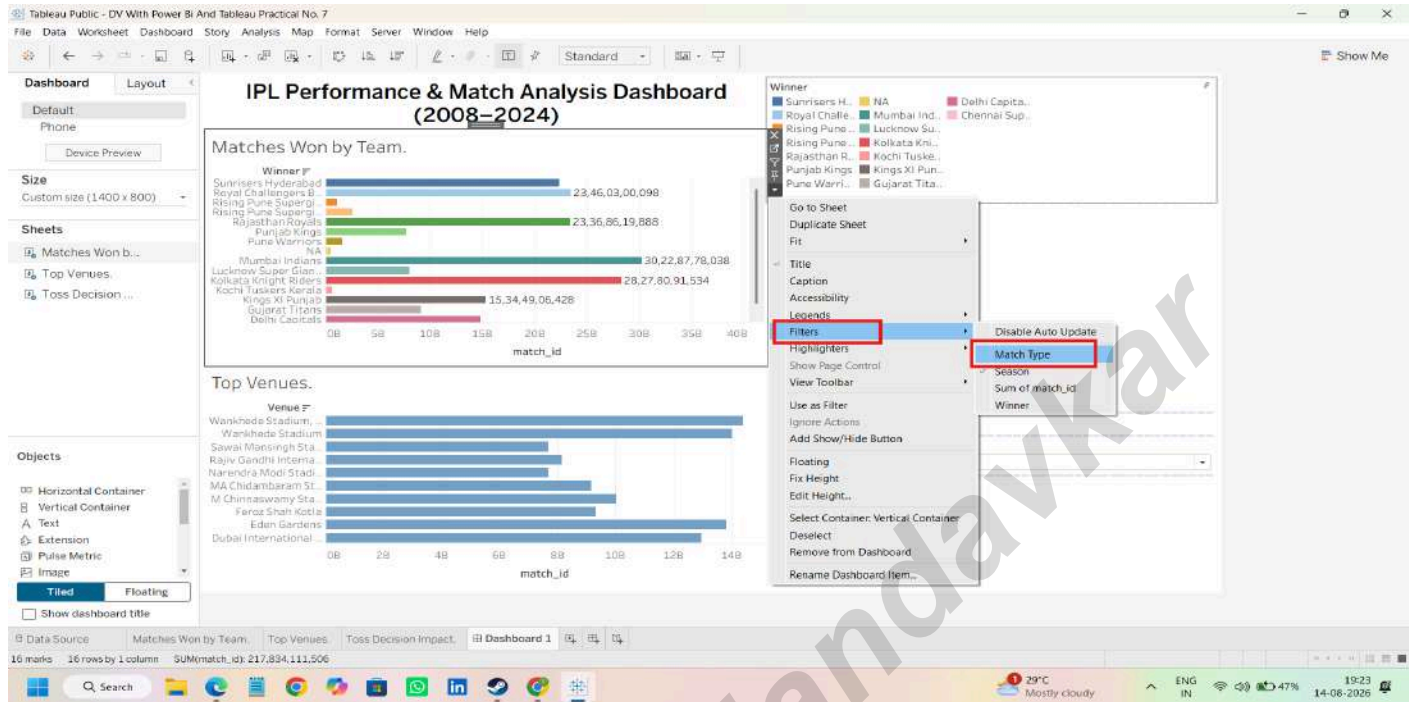

**Match Type (Filter by League vs. Playoff / Final matches) - set control type to Single Value (List) or Radio Buttons.**

## City or Toss Decision - set as a Multiple Values (Dropdown).

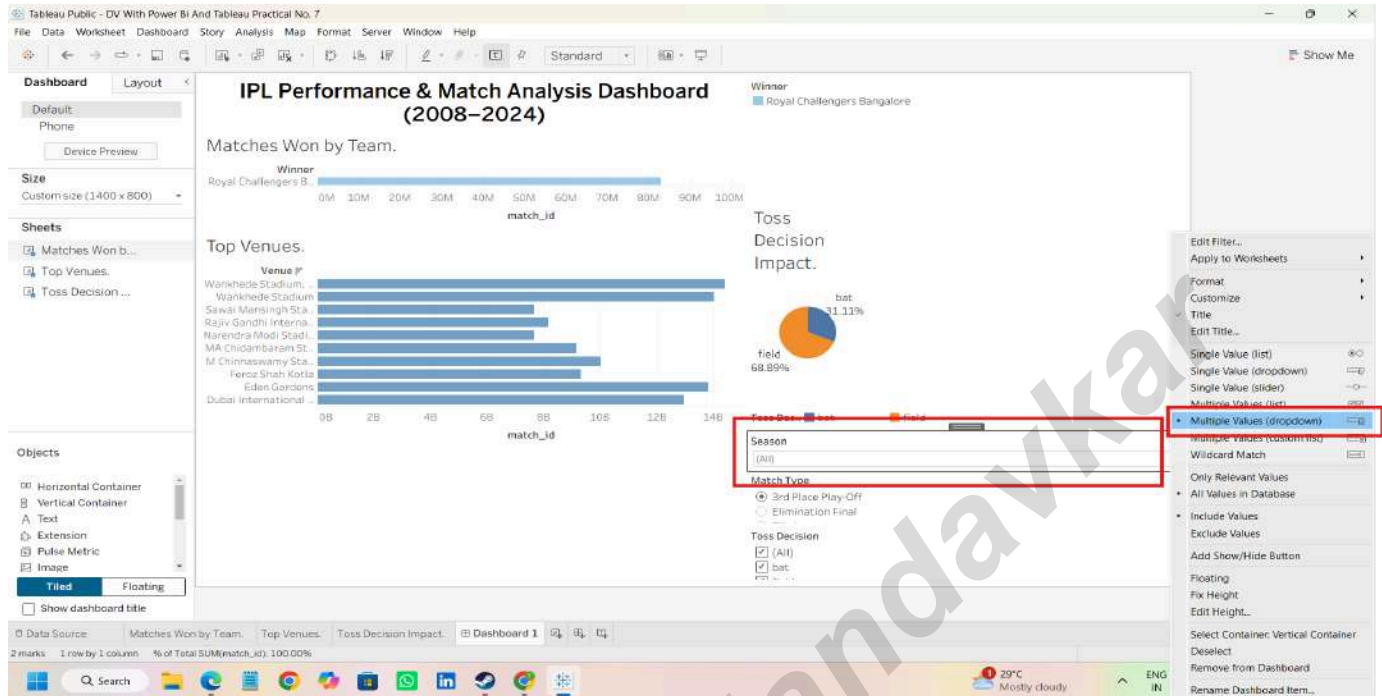

Name:- Chetan Mandavkar

Roll No. T093

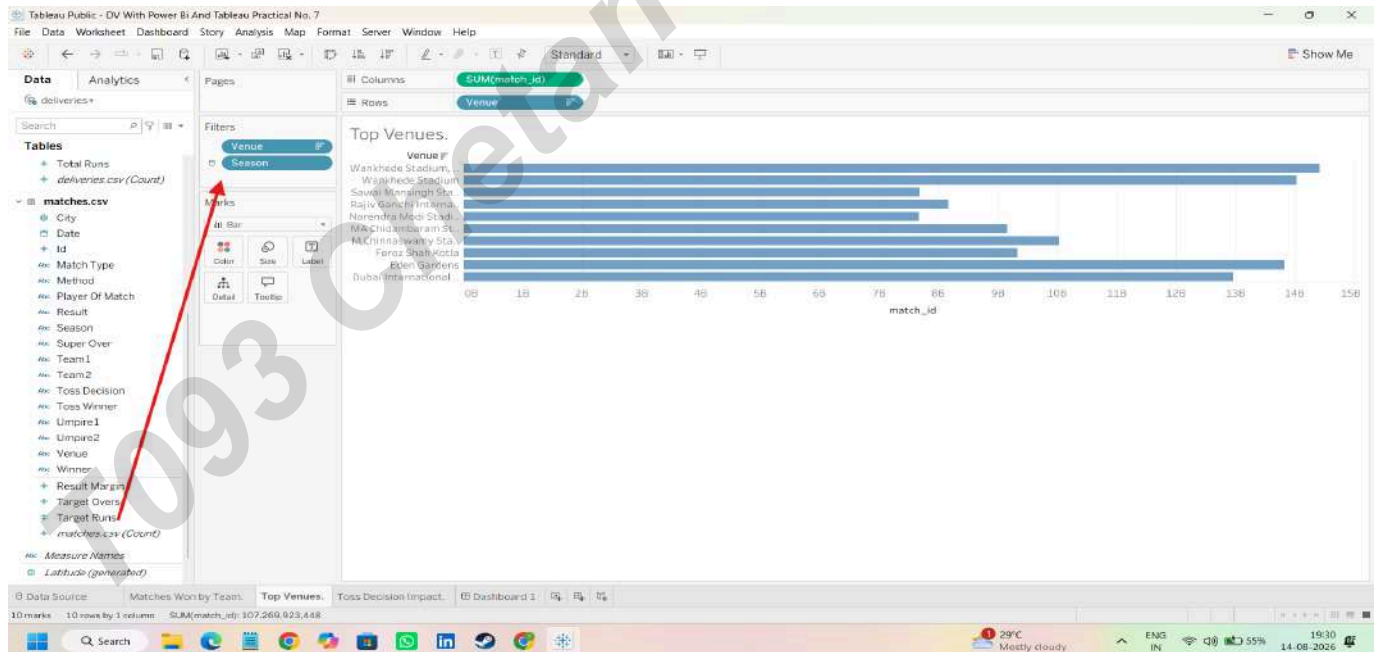

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 6:- Go to the Top Venues sheet. Drag Target Runs to the Filters card. Choose Range of Values and click OK.**

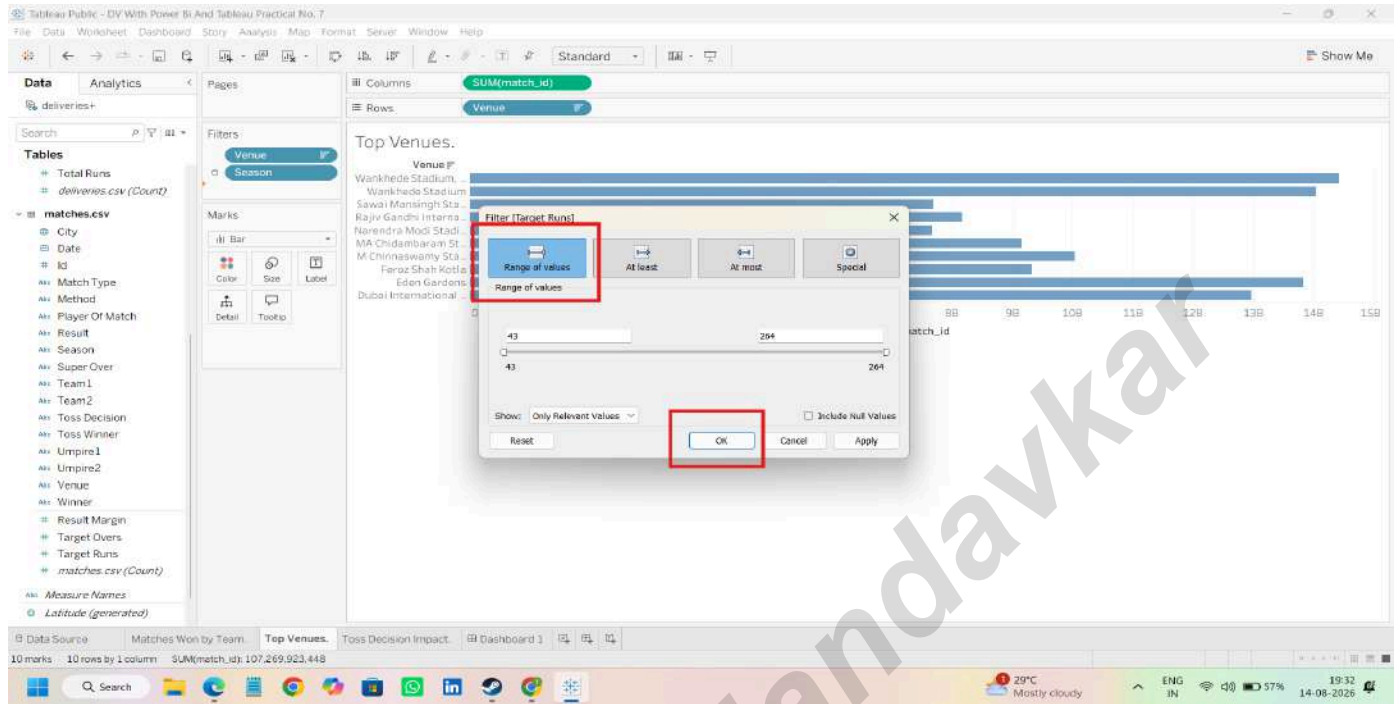

**Name:- Chetan Mandavkar**

**Roll No. T093**

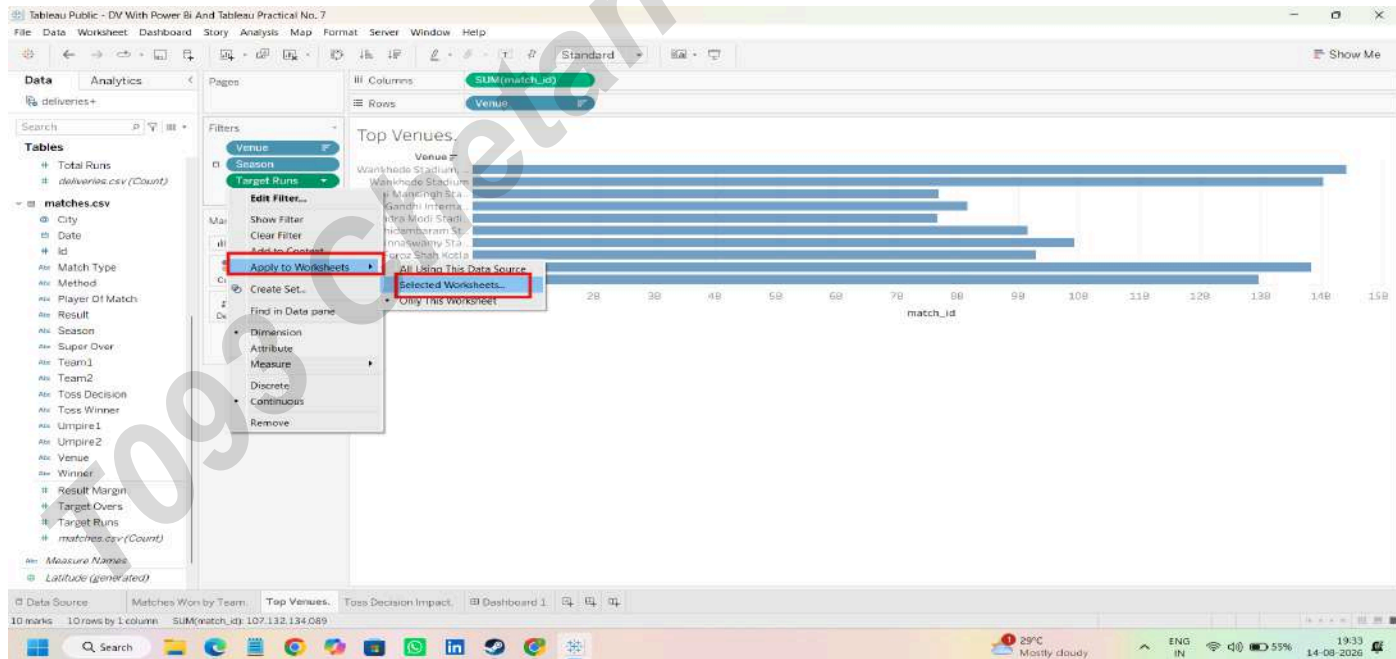

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**Step 7:- Right-click the Target Runs filter pill Apply to Worksheets Selected Worksheets (check all 3 dashboard sheets).**

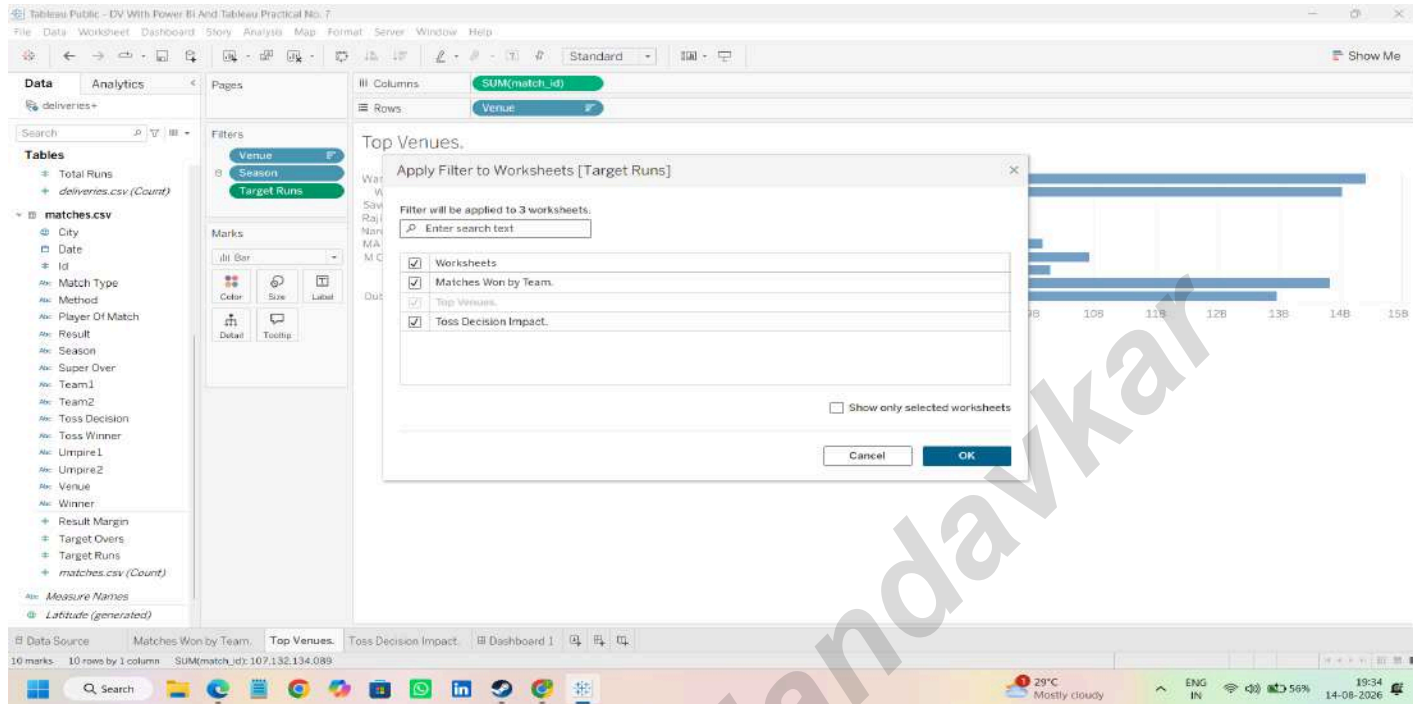

**Name:- Chetan Mandavkar**

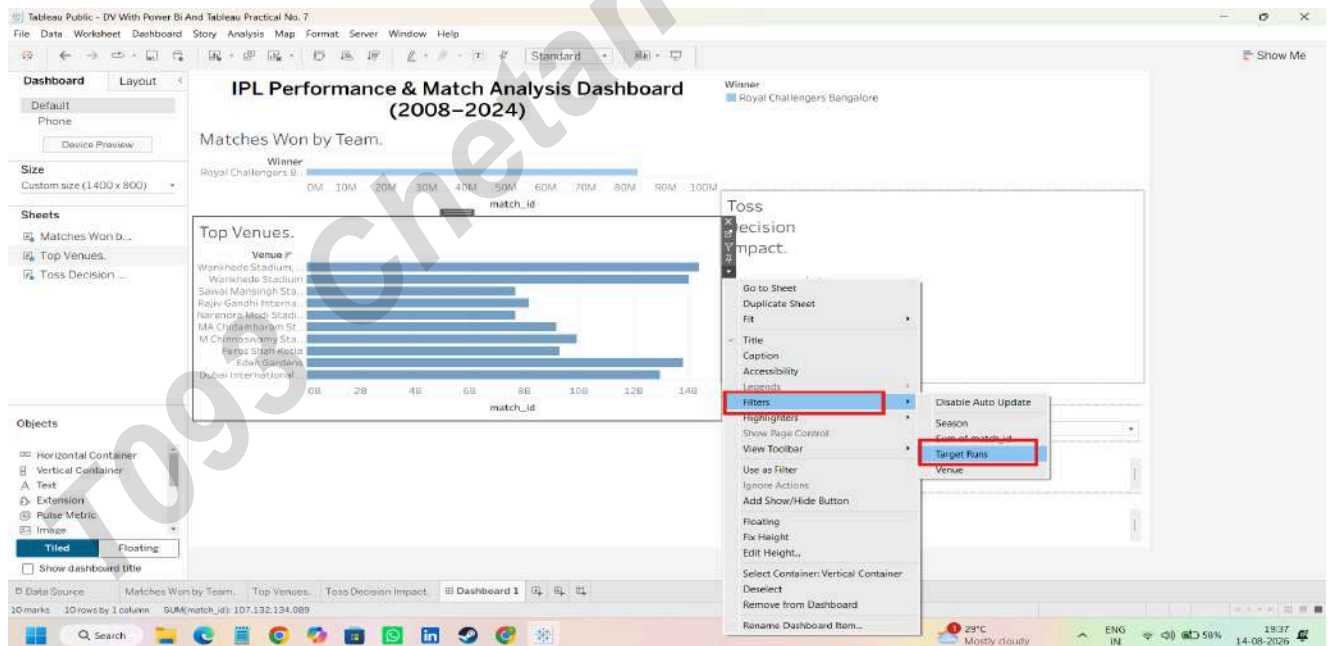

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**Step 8:- On the dashboard, enable the Target Runs filter from the chart's options menu.**

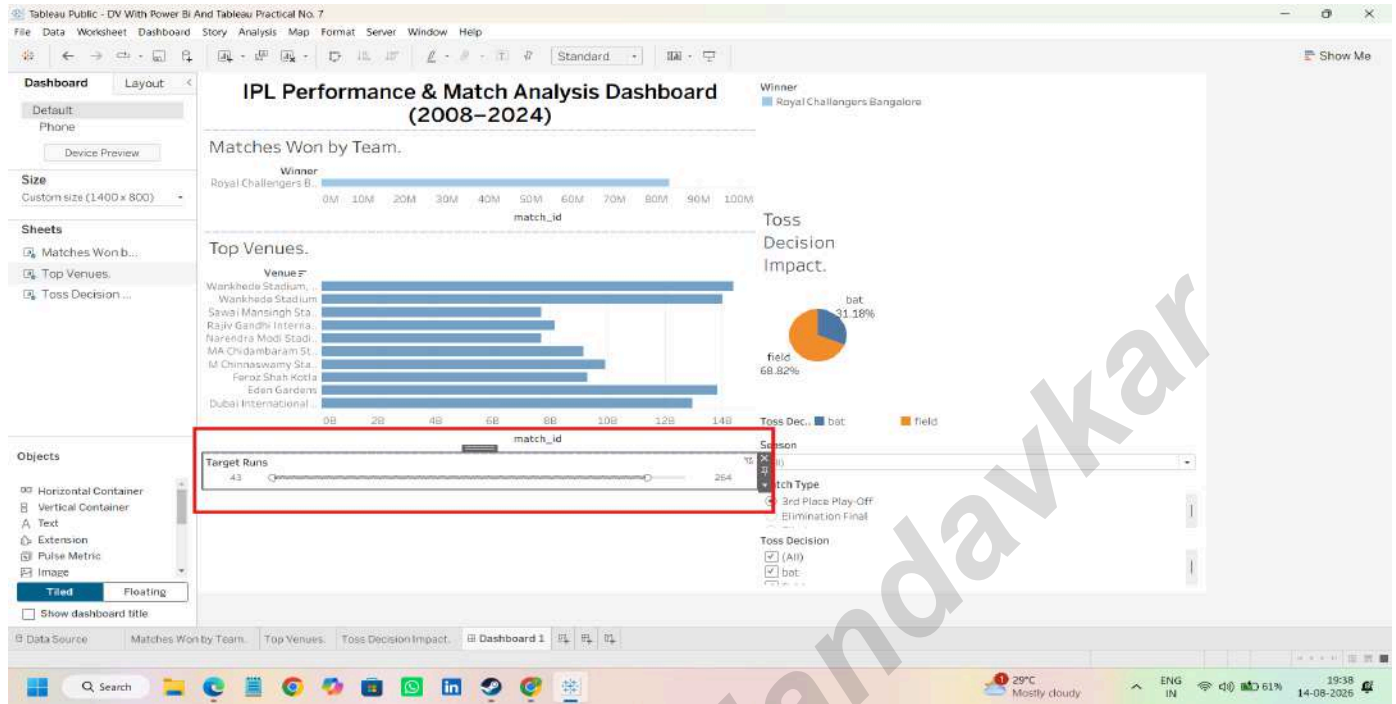

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

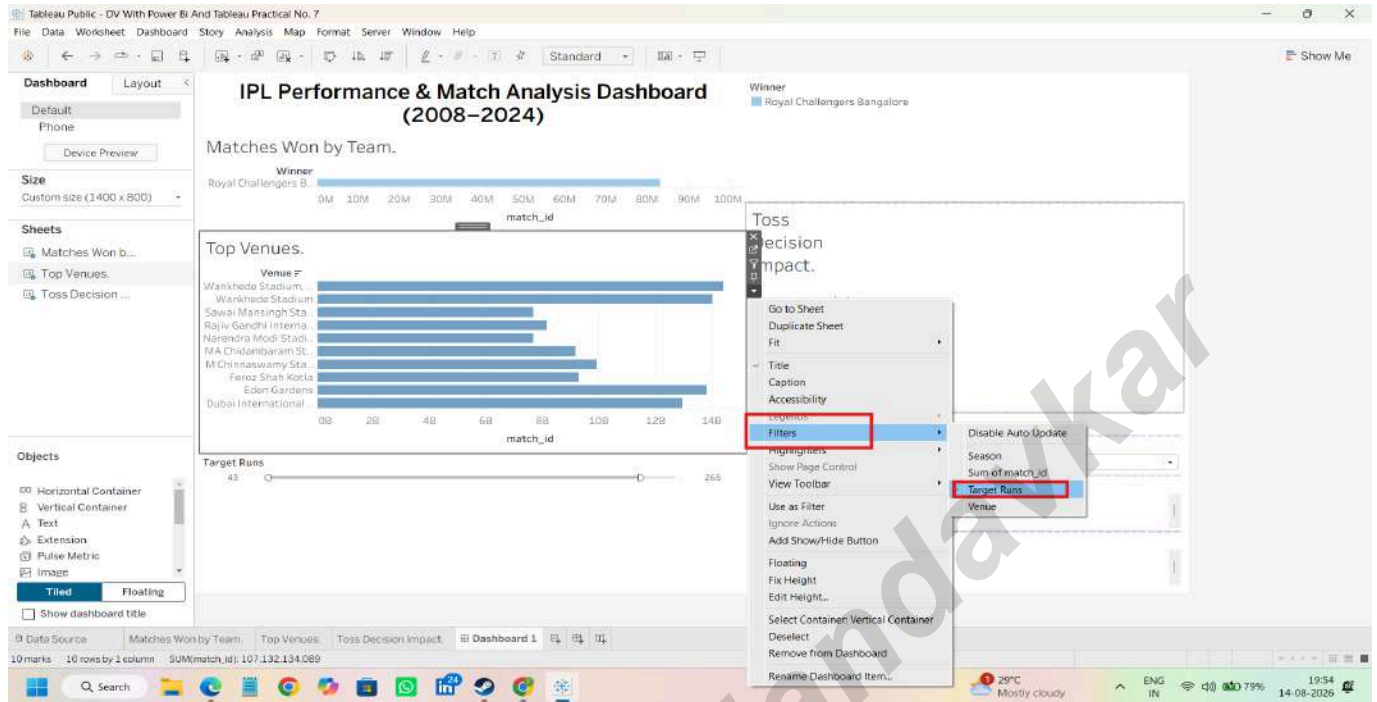

- Step 9:- On your Dashboard tab, click on the Top Venues chart border box to select it.**
- 2. Look at the top-right corner of the selected blue boundary box and click the More Options drop-down arrow (the small inverted triangle).**
- 3. In the pop-up menu, go to Filters.**
- 4. Click on Target Runs (or SUM(Target Runs)).**

Name:- Chetan Mandavkar

Roll No. T093

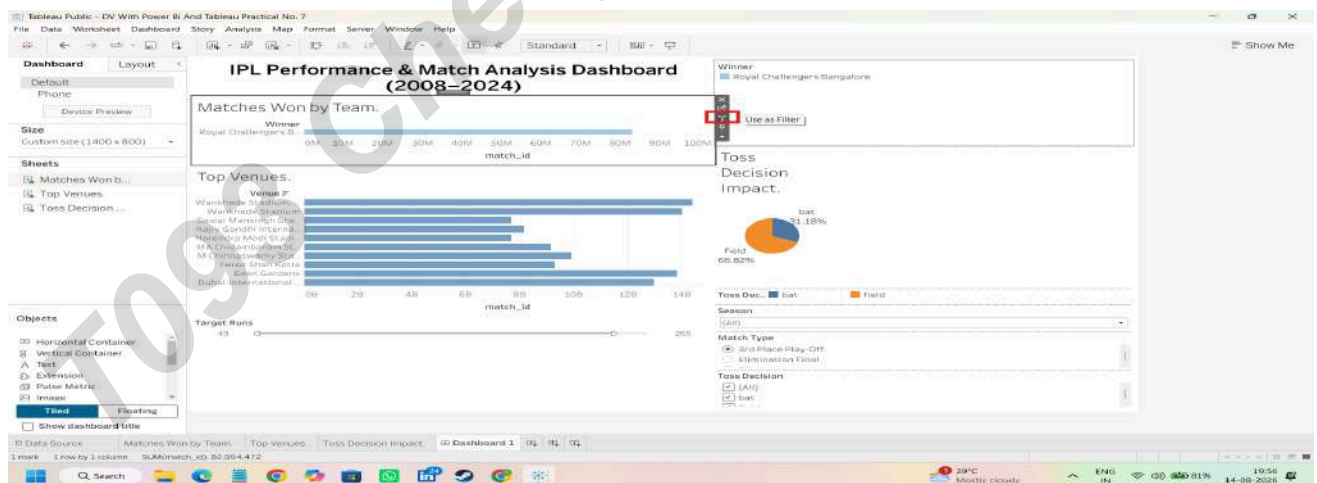

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

## C: Implement highlight and filter actions

**Step 1:-** 1. Click on the Matches Won by Team chart box on your dashboard to select it. 2. Look at the small vertical toolbar that pops up on the top right side of the sheet border. 3. Click the Use as Filter icon (it looks like a small funnel symbol).

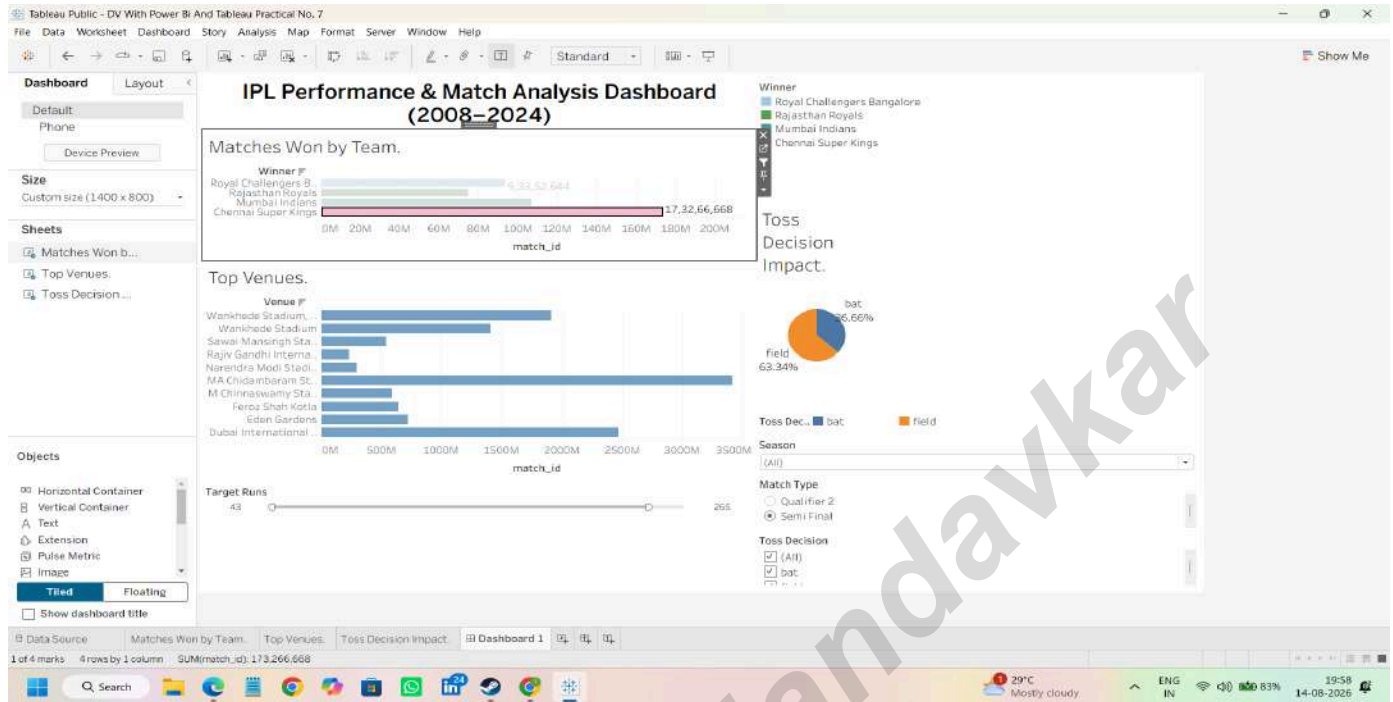

Name:- Chetan Mandavkar

Roll No. T093

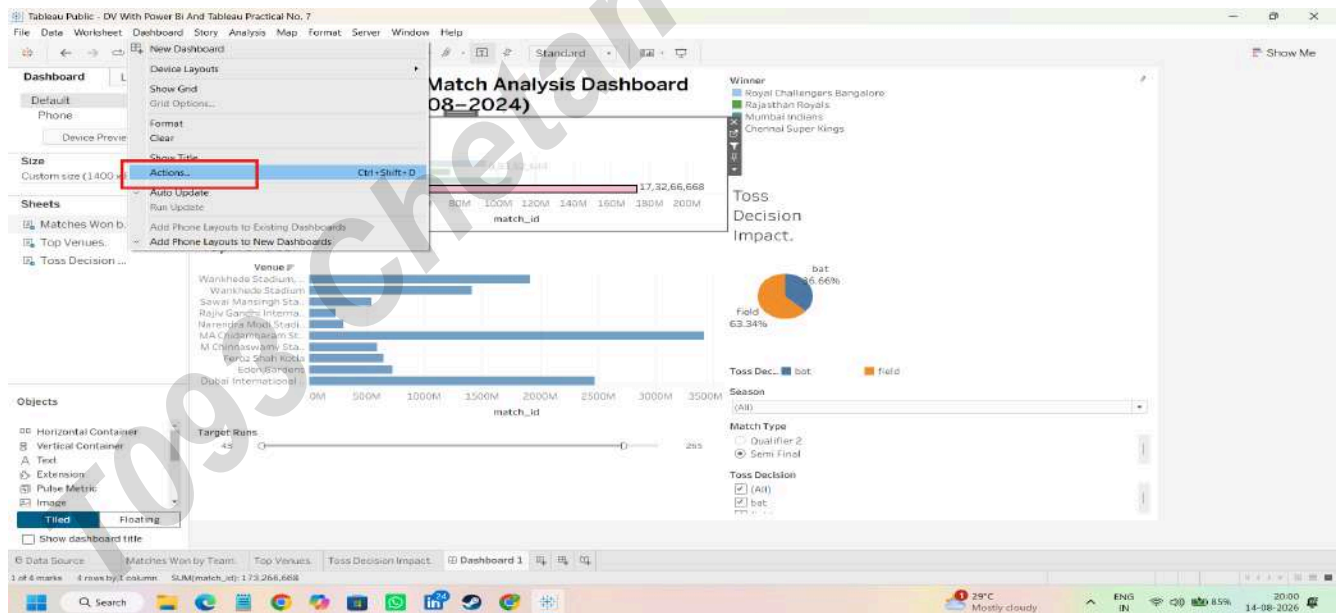

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 2:- On the top menu bar, go to Dashboard --> Actions... 2. In the Actions window, click Add Action > and choose Highlight...**

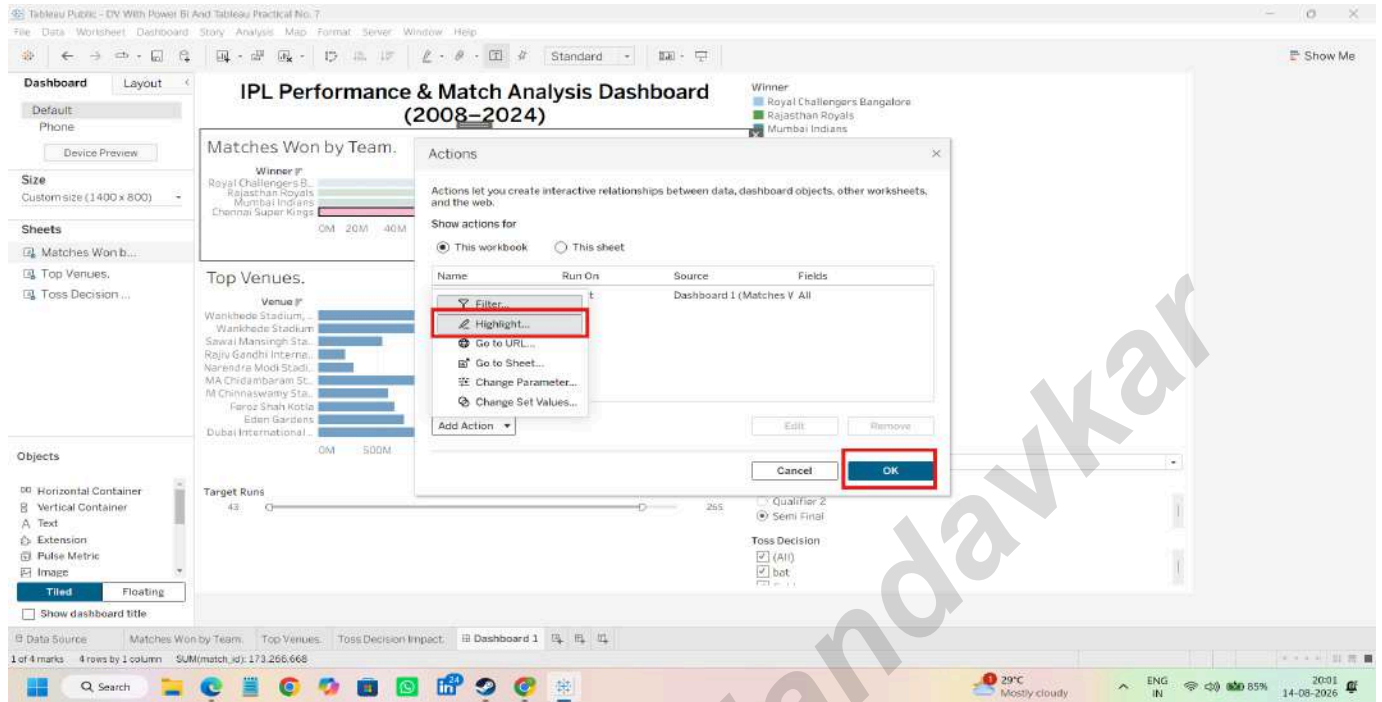

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**Name the action: Highlight Team Across Charts.**

**4. Set up the rules:**

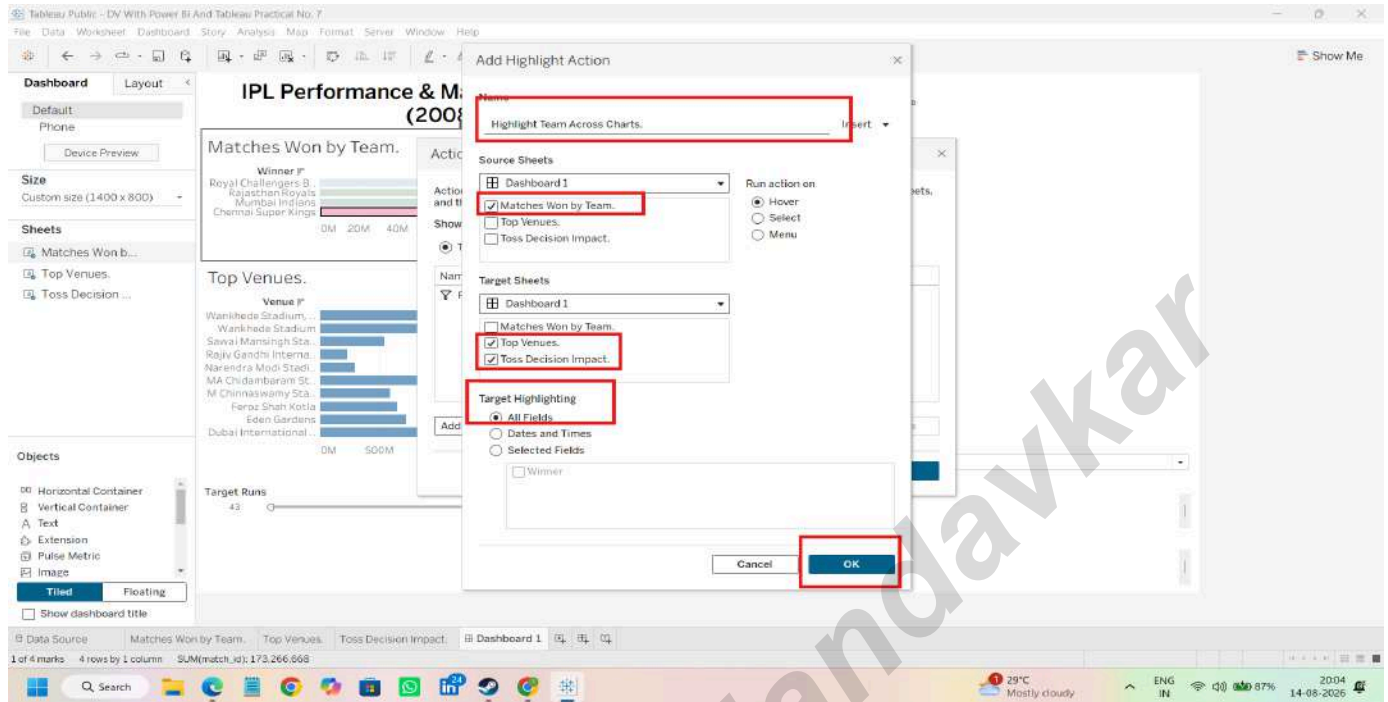

- o **Source Sheets: Select Matches Won by Team.**
  - o **Run action on: Select Hover (or Select if you prefer clicking).**
  - o **Target Sheets: Select Top Venues and Toss Decision Impact.**
  - o **Target Fields: Leave as All Fields or explicitly select Winner / Team1.**
- 5. Click OK, then click OK again to save.**

**Name:- Chetan Mandavkar**

**Roll No. T093**

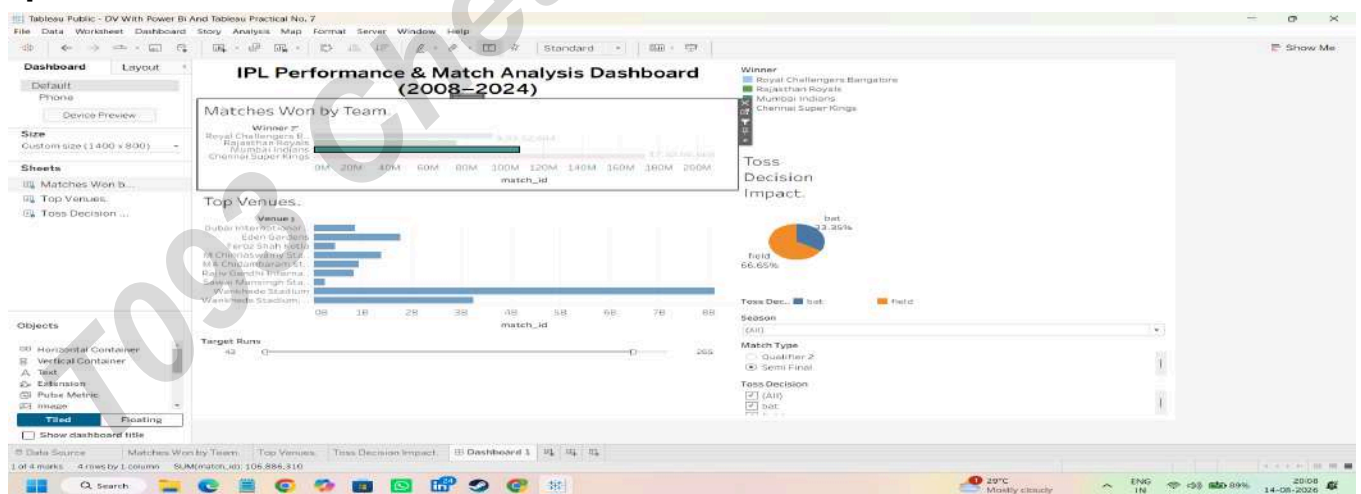

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**Step 3:- Hovering:** Hover your mouse over any bar in Matches Won by Team to see associated data highlight across other sheets.

**Clicking:** Click a venue in Top Venues (if "Use as Filter" is enabled there too) to see which teams have won the most matches at that specific stadium!

**Name:-** Chetan Mandavkar

**Roll No.** T093

**Subject:-** Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

## D: Use URL and set actions for interactivity

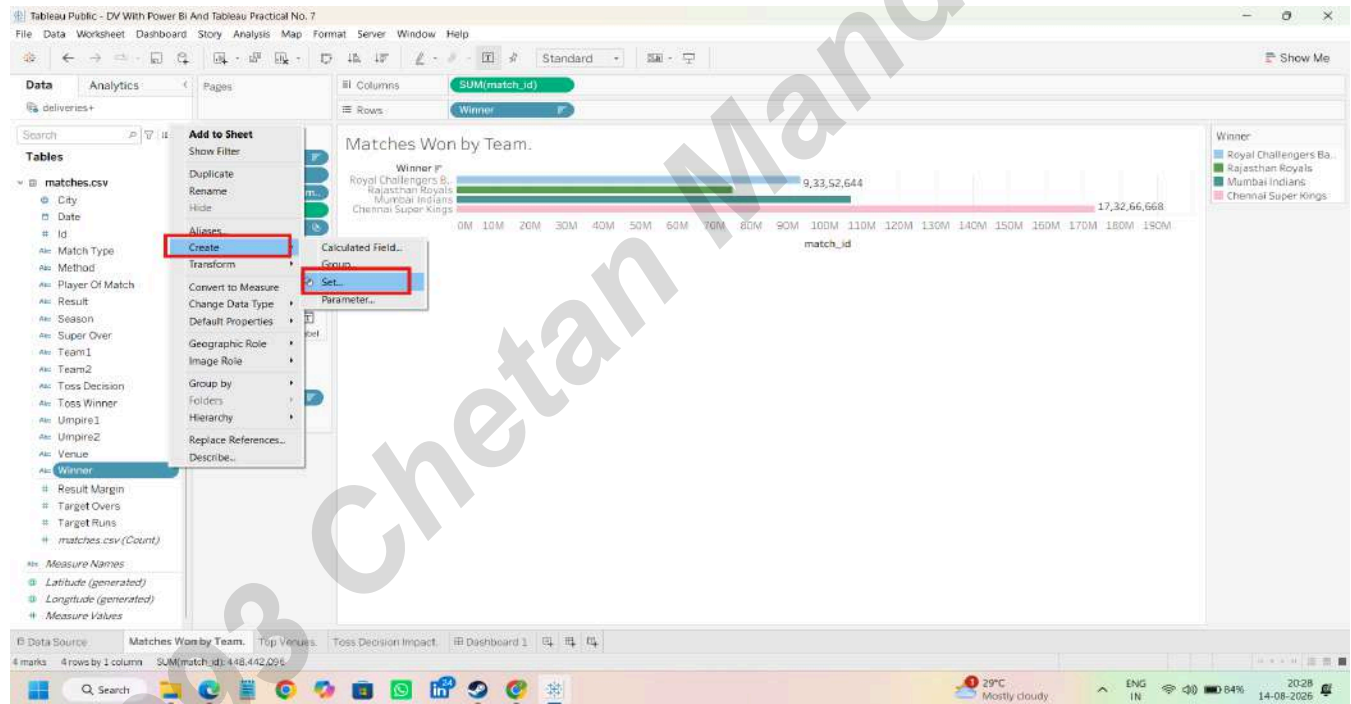

1. URL Action: Clicking a team or player name opens their official Wikipedia/ESPNcricinfo profile directly in a browser (or Web Page Object inside Tableau).
2. Set Action: Selecting one or more teams on a sheet dynamically updates a "Selected vs. Rest of League" comparison.

Step 1:- 1. Go to the Data pane on the left side of any worksheet.

2. Right-click the Winner field Create Set...

Name the set: Selected Teams Set.

4. Select any single team (e.g., Mumbai Indians) just as a temporary placeholder. click OK.

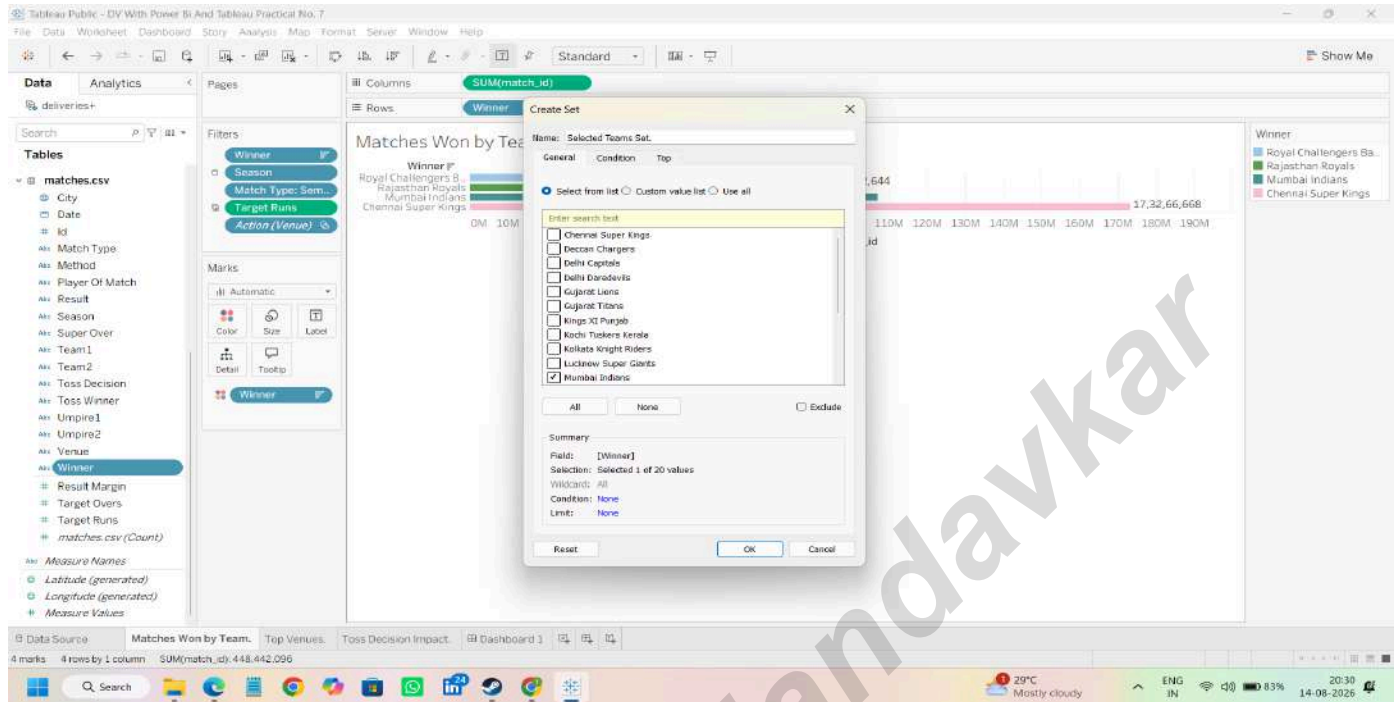

Name:- Chetan Mandavkar

Roll No. T093

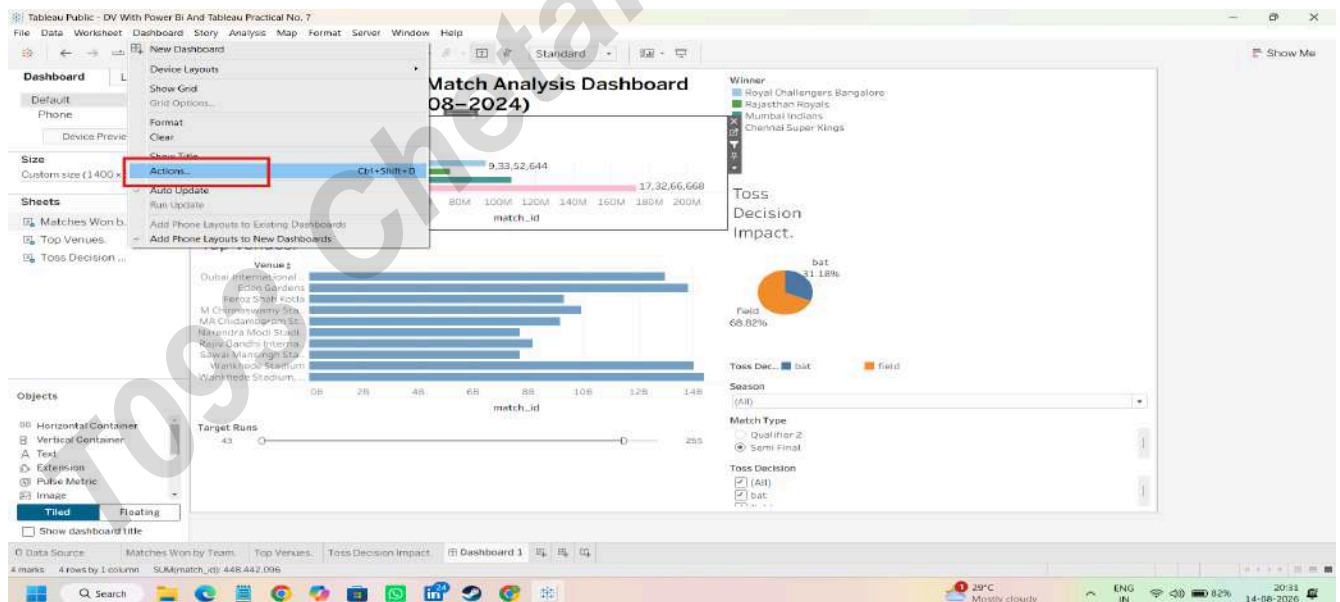

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

- Step 2:- 1. Return to your main Dashboard tab.
2. Go to the top menu bar: Dashboard Actions...
3. Click Add Action > select Change Set Values...

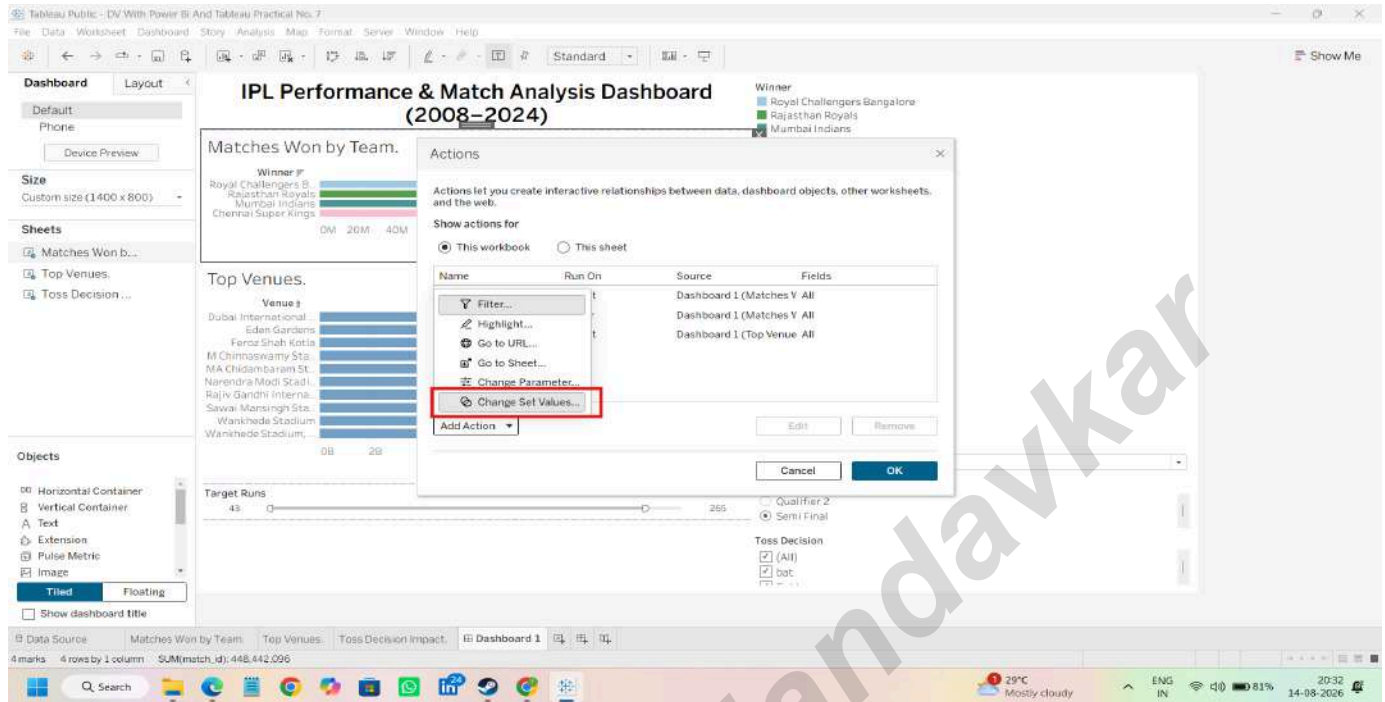

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

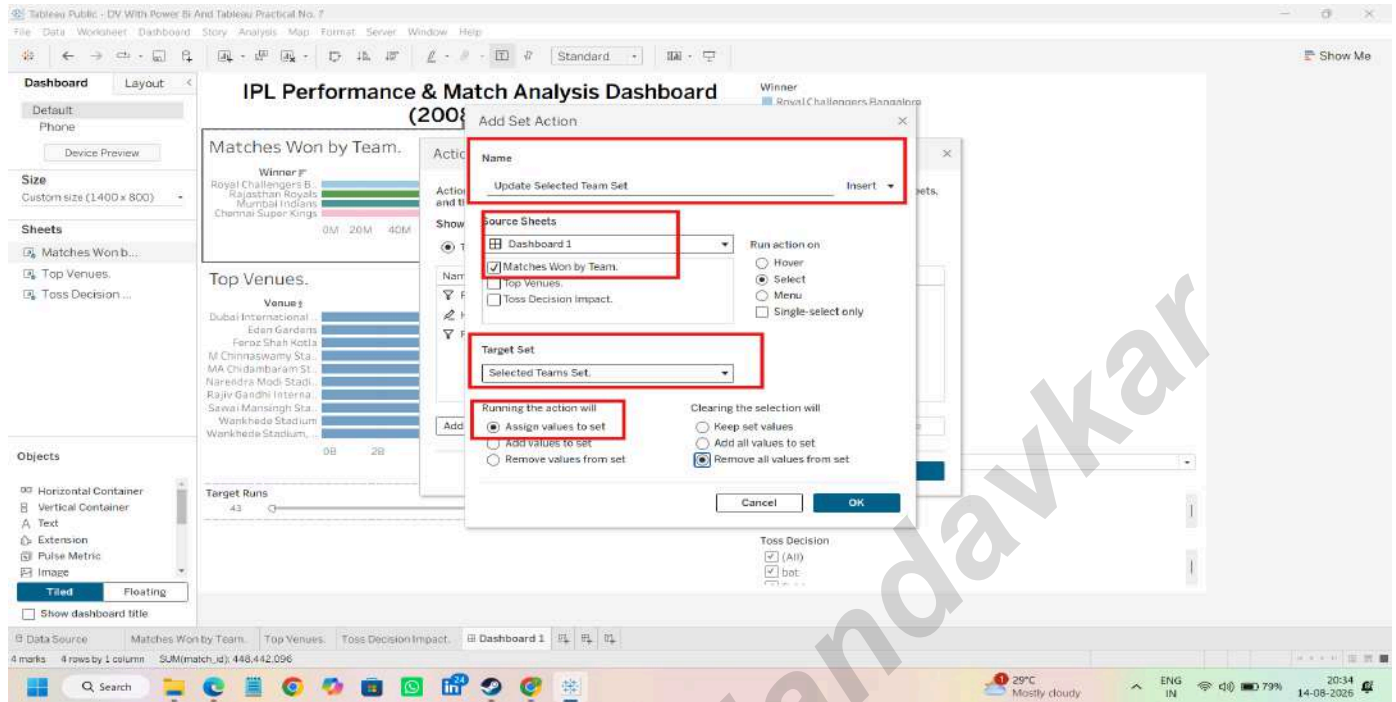

- Set up the details:
  - o Name: Update Selected Team Set
  - o Source Sheets: Select Matches Won by Team
  - o Run action on: Select
  - o Target Dataset: Choose your IPL dataset/matches file.
  - o Set: Choose Selected Teams Set.
  - o Running the action will: Assign values to set
  - o Clearing the selection will: Remove all values from set (or Keep set values).
5. Click OK, then click OK again.

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 3:- Go to the top menu: Dashboard Actions...**

**2. Click Add Action > select Go to URL...**

**3. Configure the URL Action:**

**o Name: Open Team Wikipedia Page o Source Sheets: Select Matches Won by Team**

**o Run action on: Menu (This displays a clean clickable hyperlink inside the tooltip when a user clicks a bar, preventing accidental page loads).**

**o URL: Paste the following dynamic URL:**

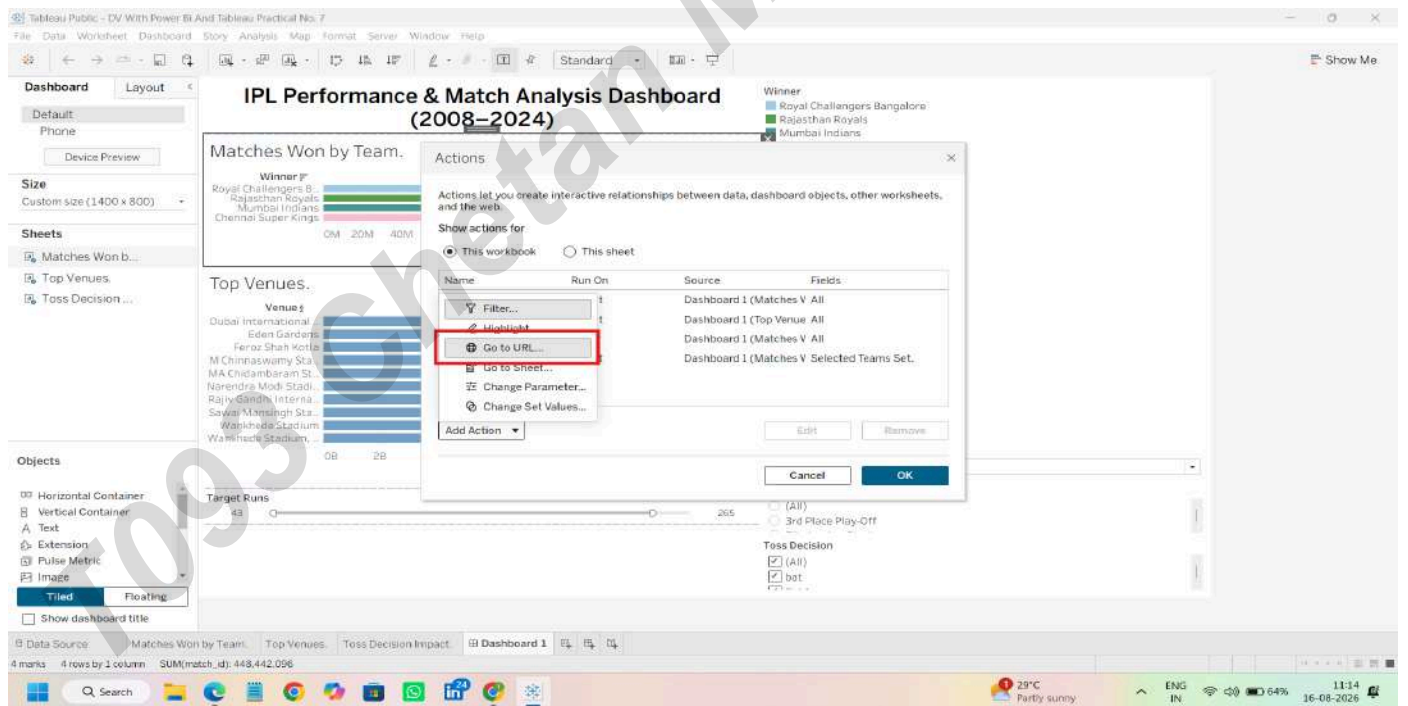

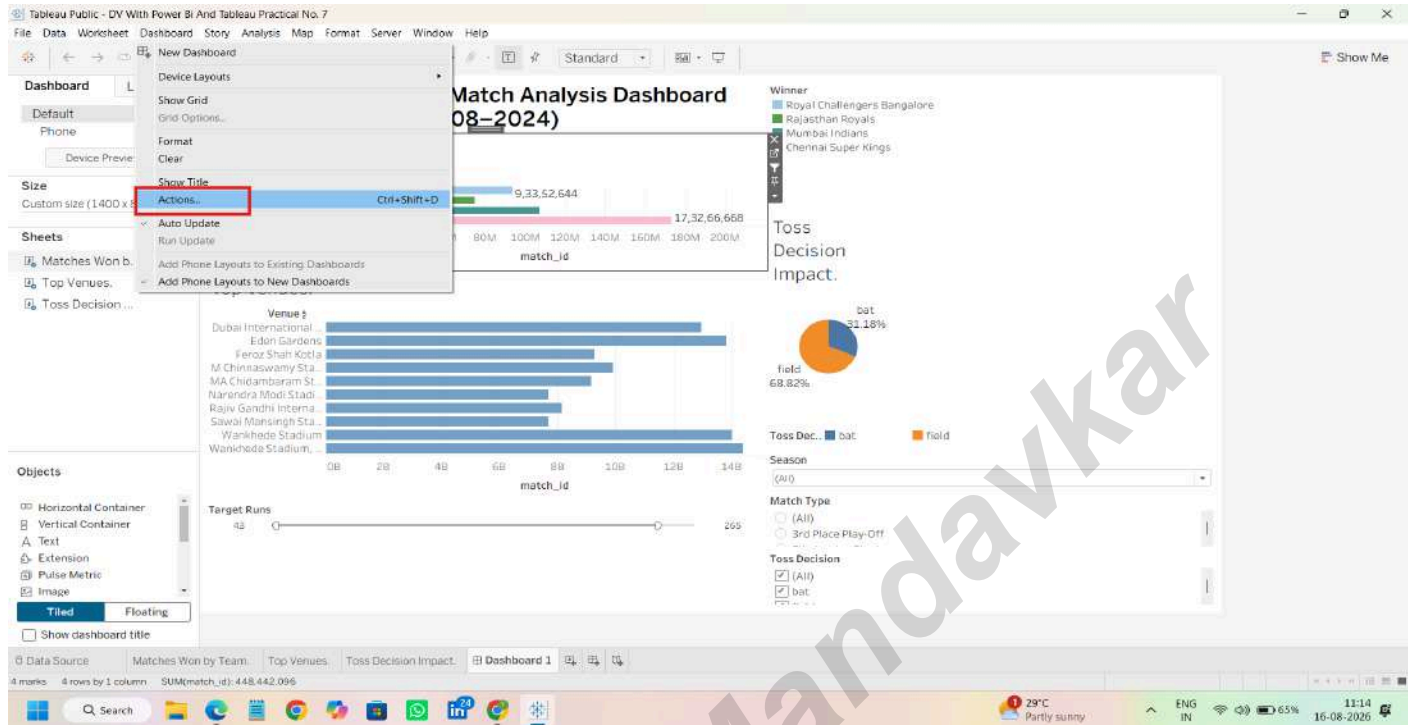

**<https://en.wikipedia.org/wiki/>**

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

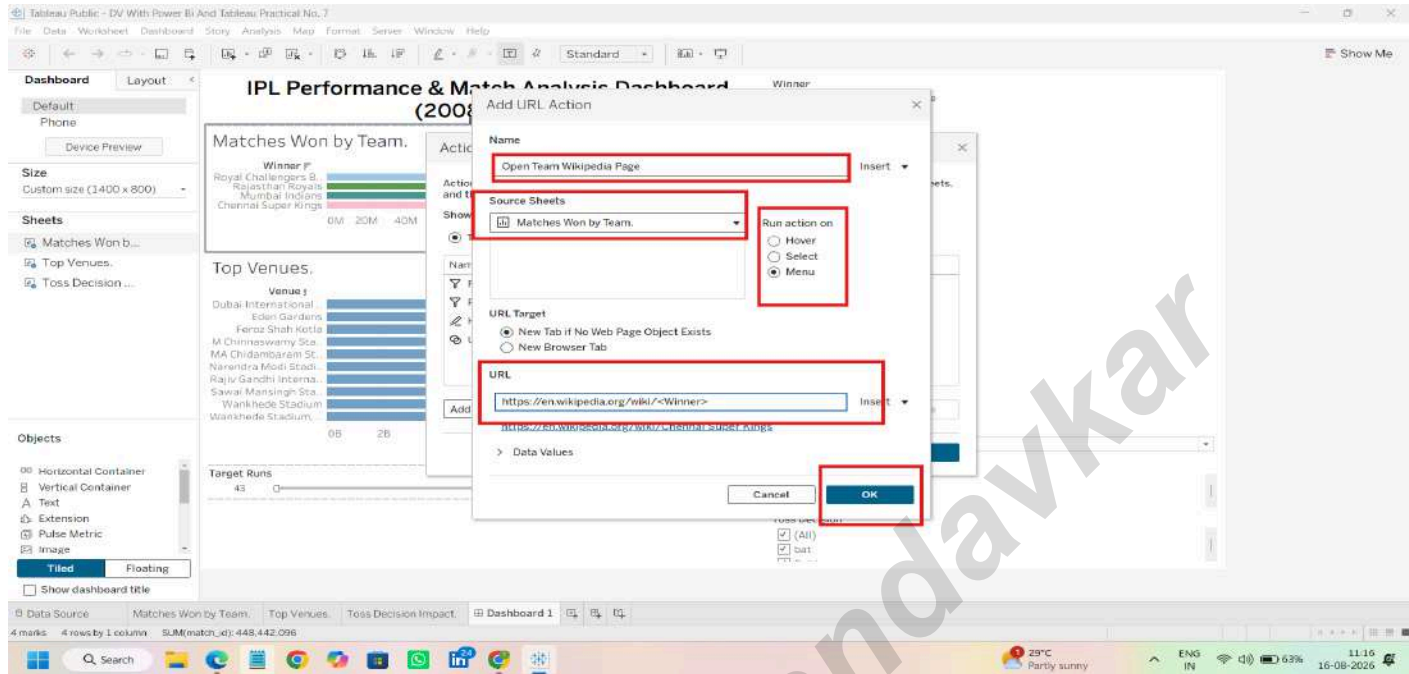

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

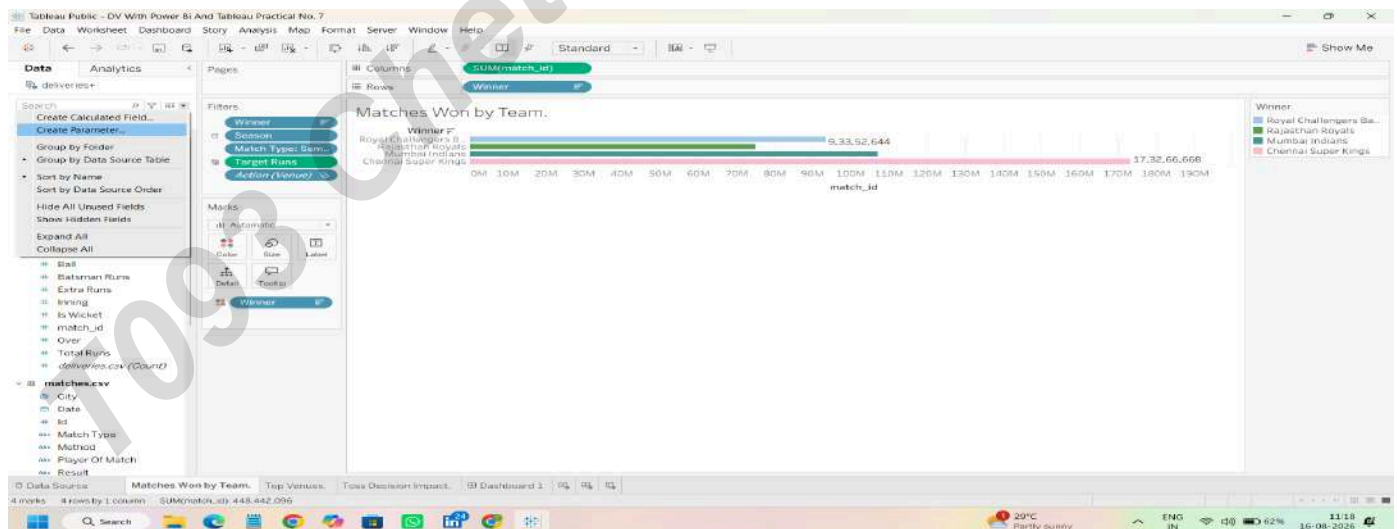

# Sheth L.U.J. And Sir M.V. College

## E: Create dynamic dashboards using parameters

Step 1:- Go to any worksheet (e.g., Matches Won by Team).

2. At the top of the Data pane on the left, click the small drop-down arrow next to the search bar (or right-click anywhere in the Data pane) and select Create Parameter...

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 2:- Configure the parameter options:**

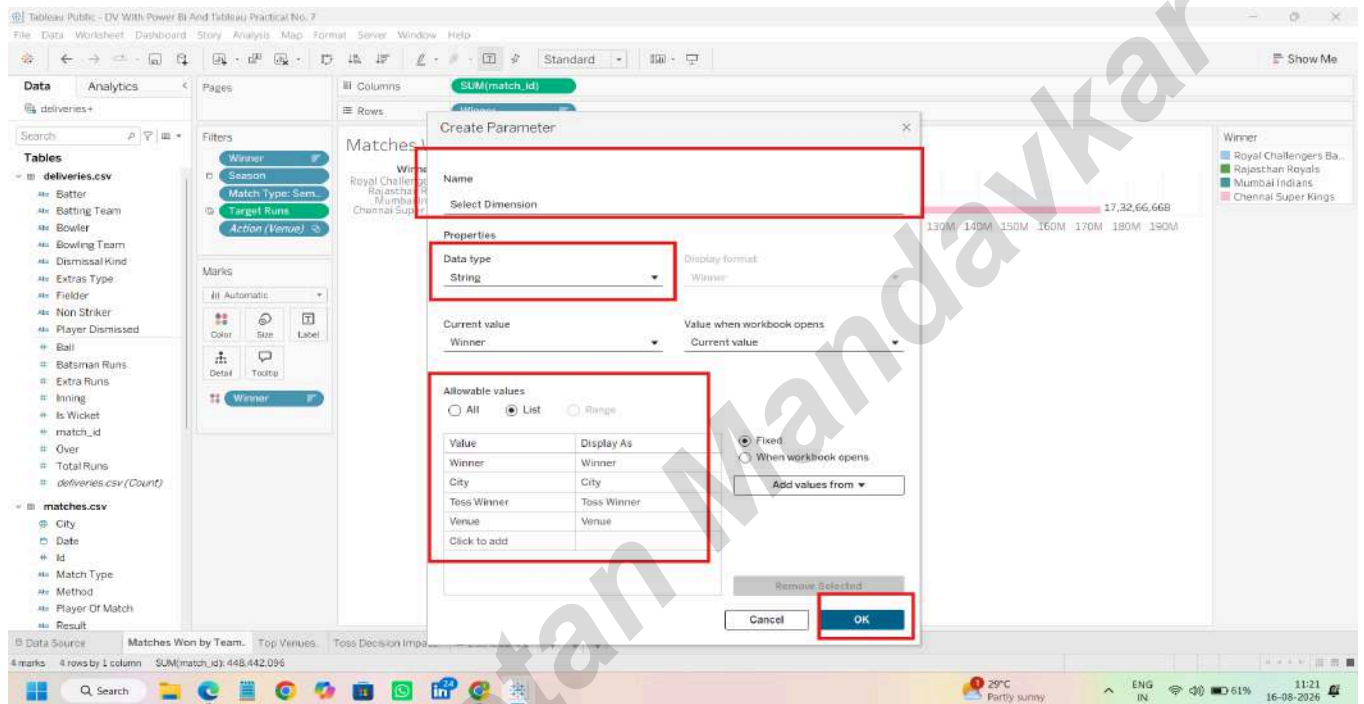

- o Name: Select Dimension

- o Data type: String
- o Allowable values: List

- o List of values: Add the following exact names in the Value column:

**Winner City Toss Winner Venue**

**And Click OK**

**Step 3:- 1. Right-click in the Data pane Create Calculated Field...**

**2. Name the field: Dynamic Dimension**

**3. Enter the following formula:**

**CASE [Select Dimension] WHEN 'Winner' THEN [Winner] WHEN 'City' THEN [City] WHEN 'Toss Winner' THEN [Toss Winner] WHEN 'Venue' THEN [Venue] END**

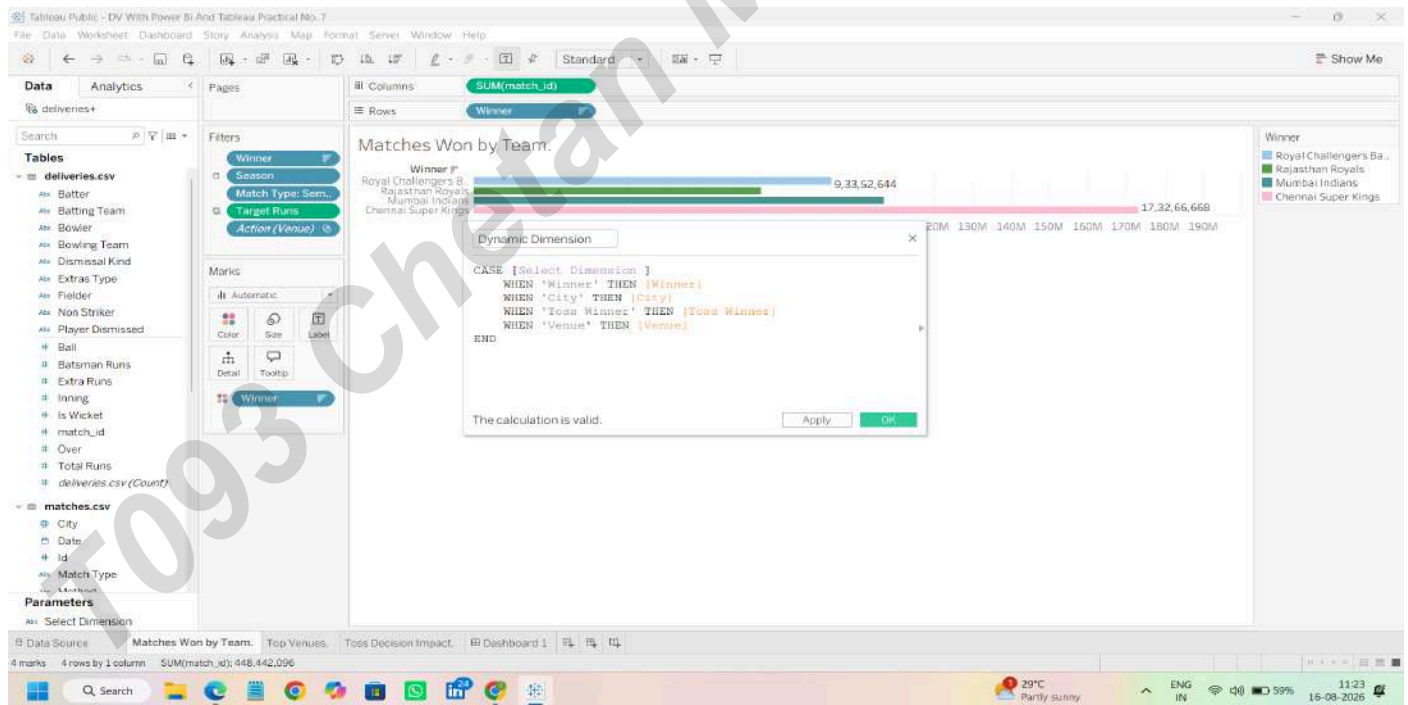

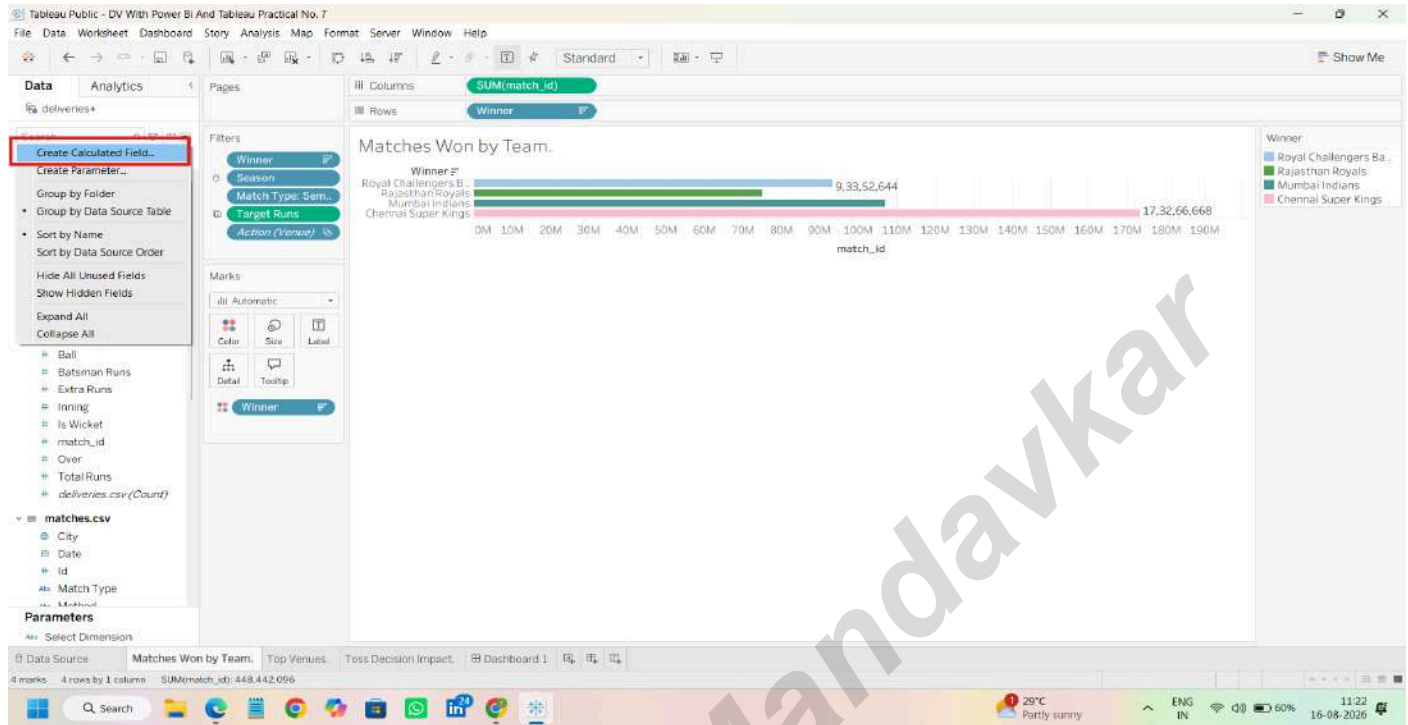

**And Click OK**

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

Name:- Chetan Mandavkar

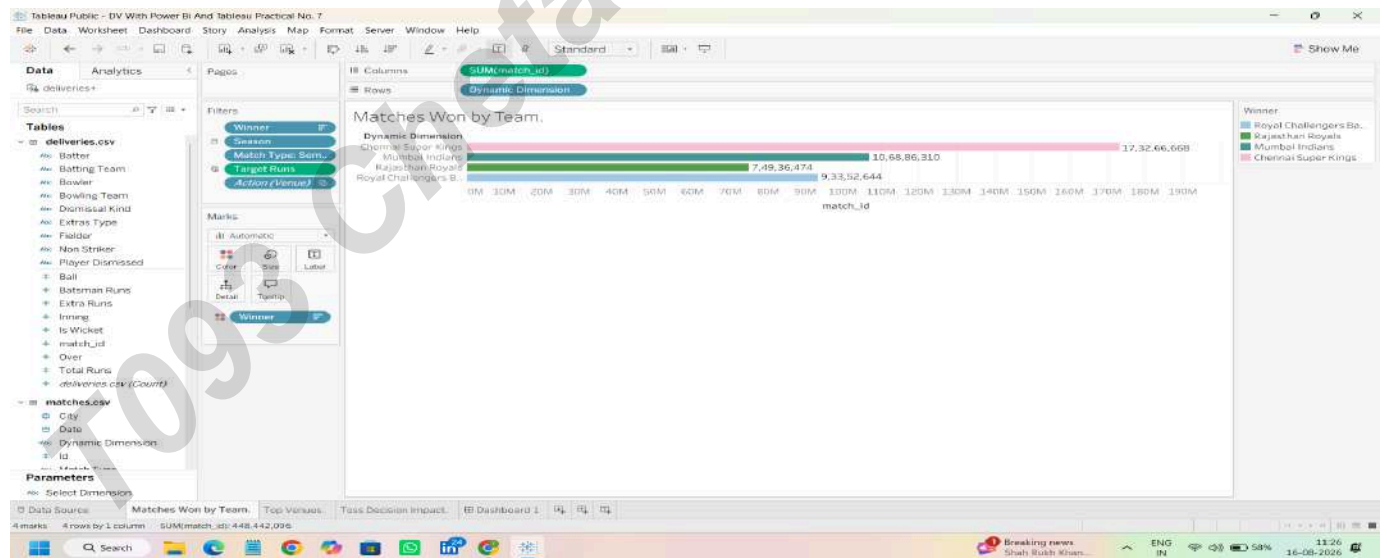

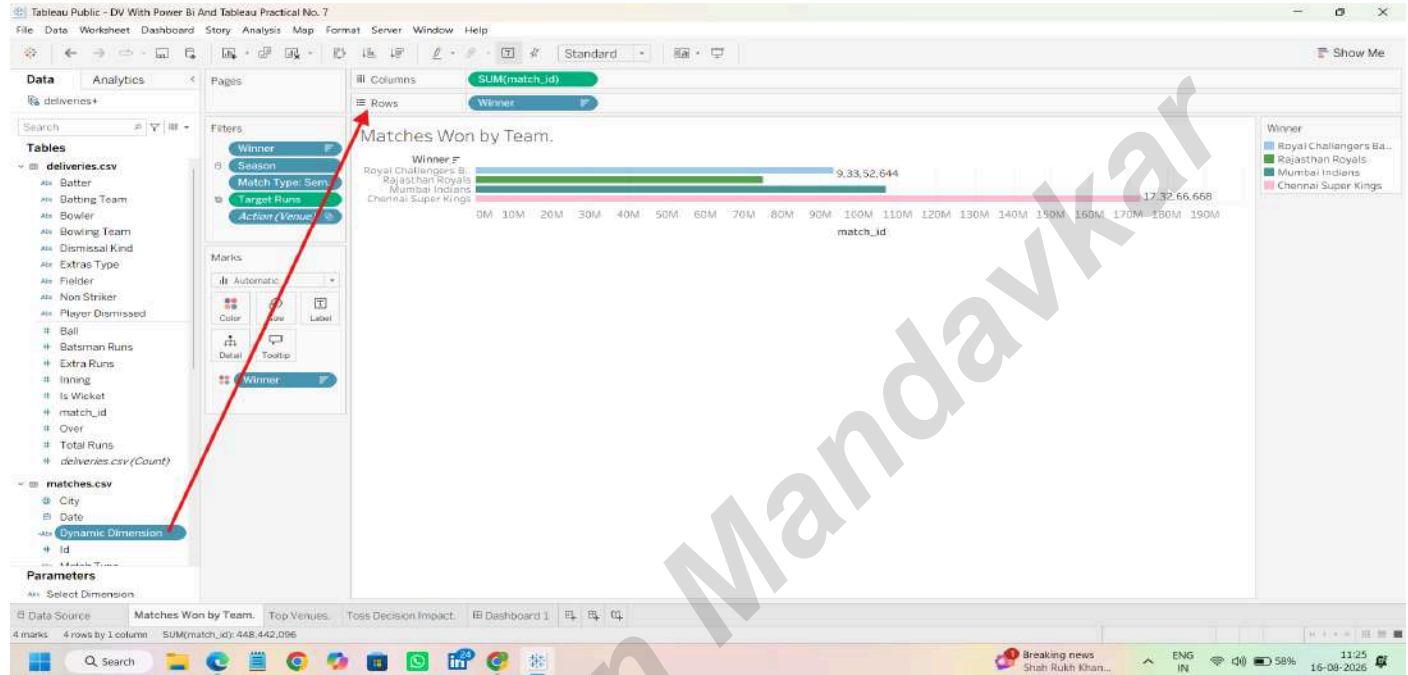

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 4:- On your Matches Won by Team sheet, locate the field currently on the Rows shelf (e.g., Winner).**

**2. Drag Dynamic Dimension from the Data pane and drop it directly over Winner on the Rows shelf to swap them.**

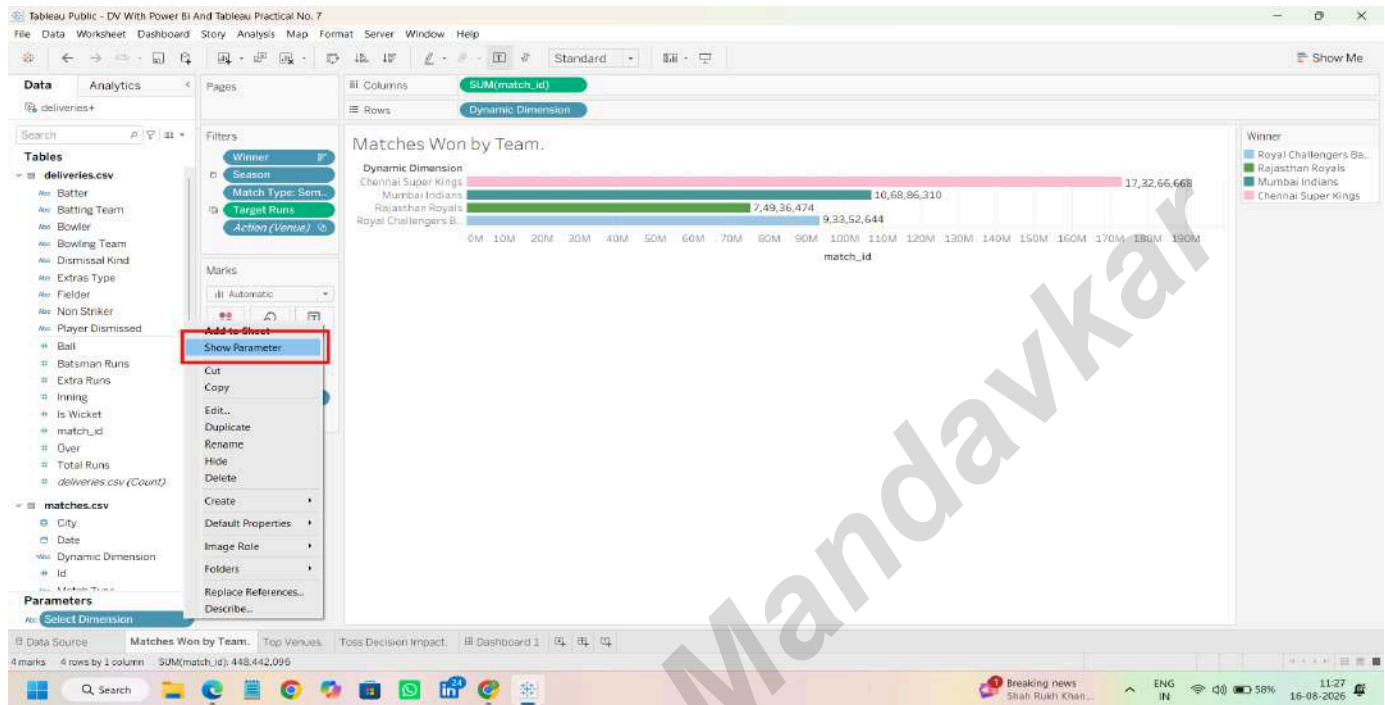

**Name:- Chetan Mandavkar**

**Roll No. T093**

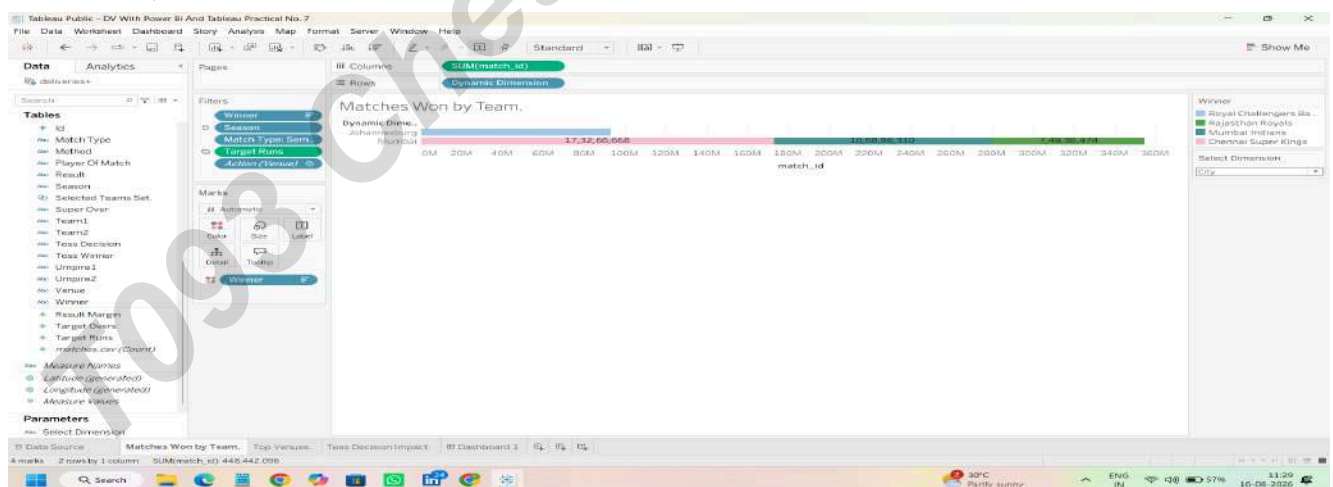

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**In the Data pane under Parameters, right-click Select Dimension and check Show Parameter.**

**Test changing the parameter selection on the right panel, you'll see the chart instantly switch between listing Teams, Cities, Toss Winners, and Venues!**

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

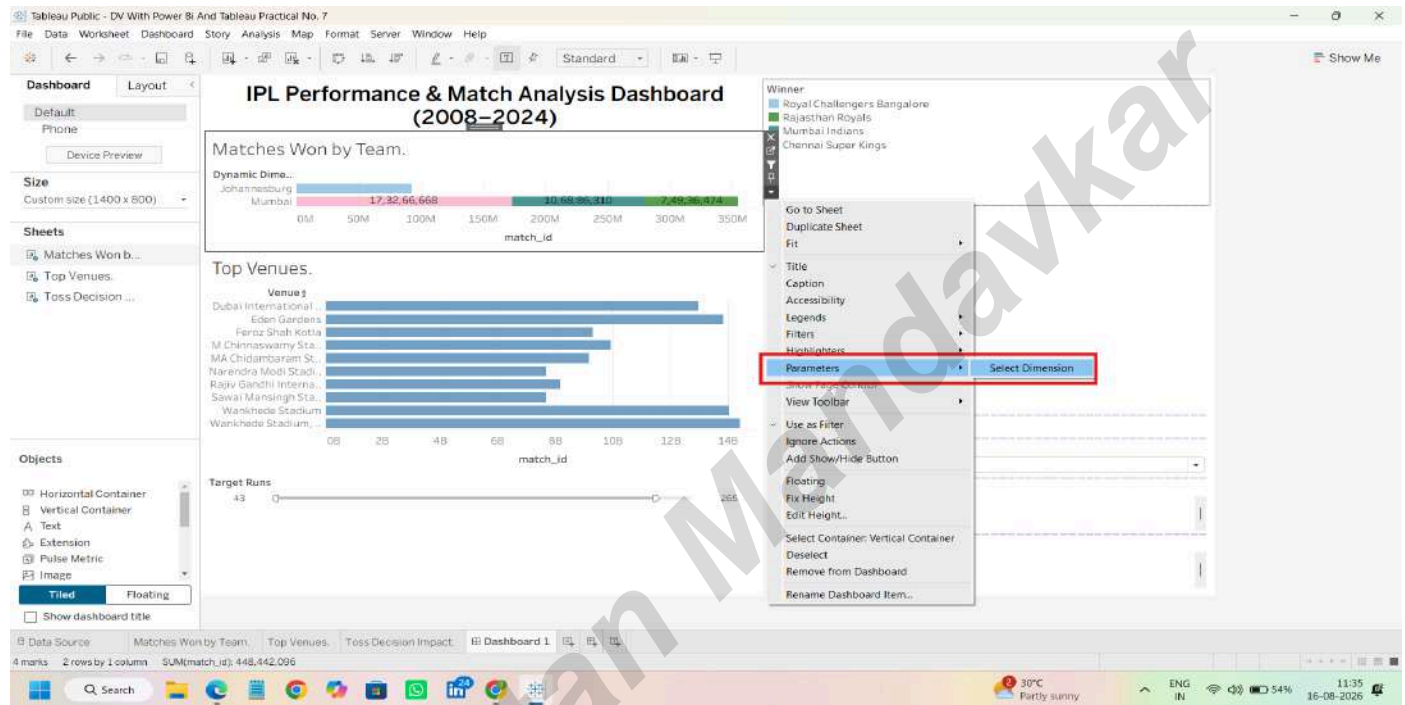

# Sheth L.U.J. And Sir M.V. College

**Step 5:- Switch back to your main Dashboard tab.**

**2. Select the dynamic chart box.**

**3. Click the More Options drop-down arrow in the top right corner of the chart outline box.**

**4. Go to Parameters select Select Dimension.**

**Position the new parameter control cleanly alongside your existing filters on the right sidebar.**

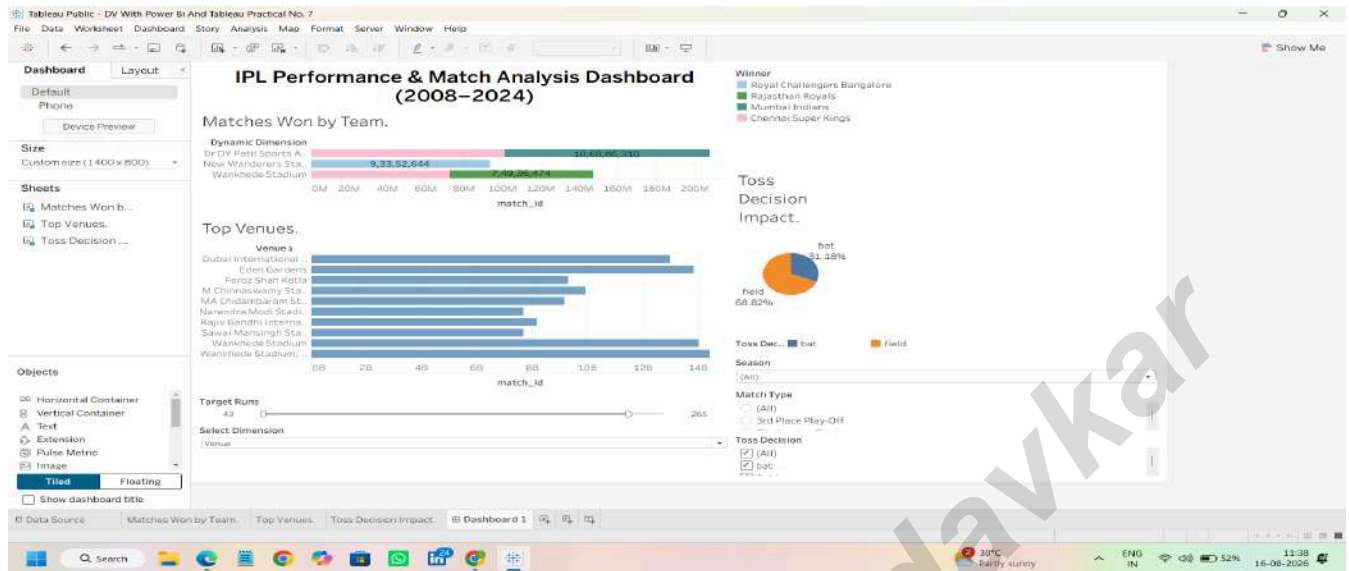

**Name:- Chetan Mandavkar**

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

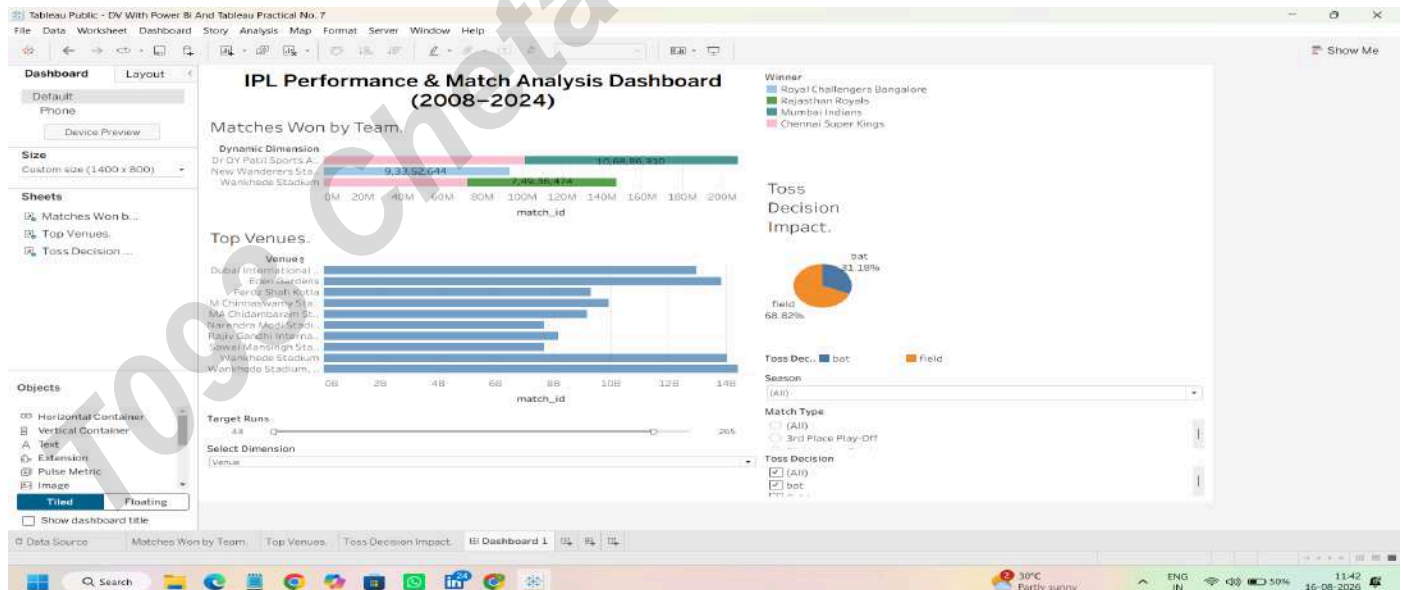

## F: Design dashboards for multiple devices

Step 1:- Switch to your main Dashboard tab.

2. In the top-left Dashboard pane, click the Device Preview button.

3. A device preview frame and toolbar will appear across the top of your dashboard canvas, showing how your layout looks on different screens.

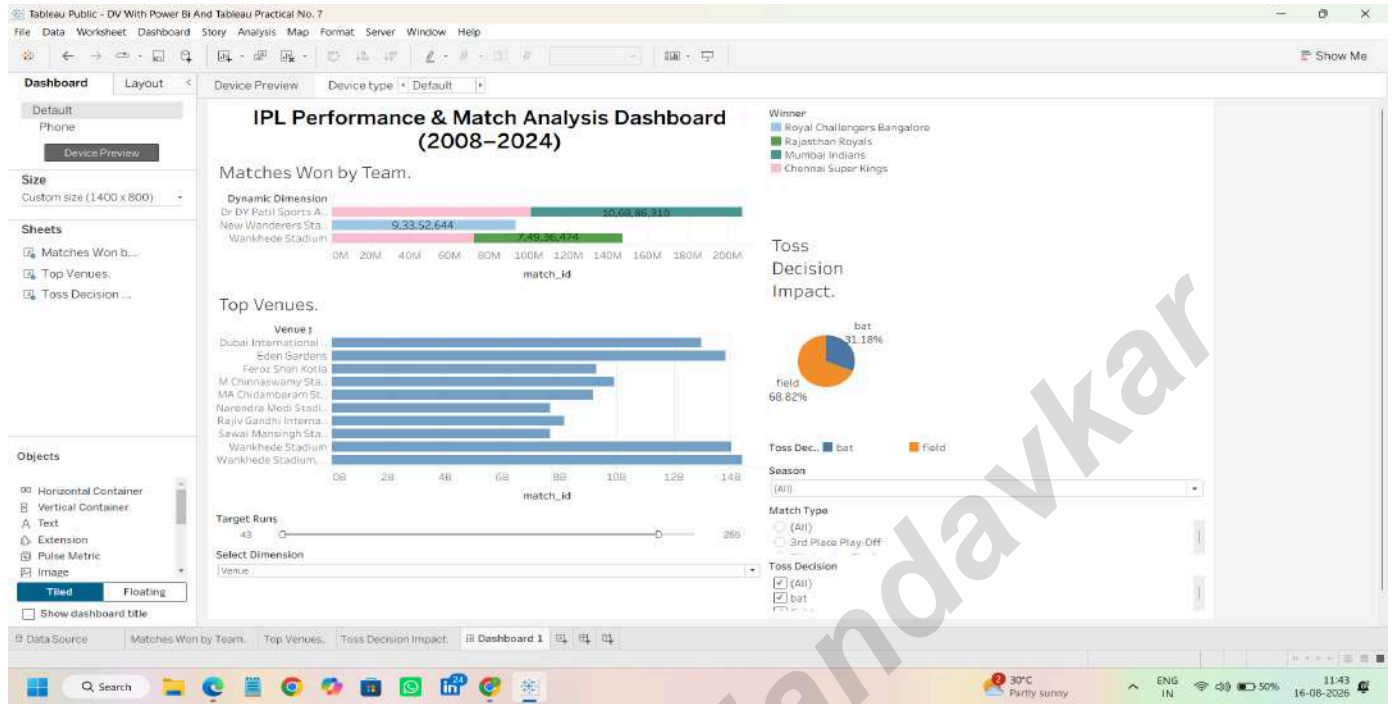

Name:- Chetan Mandavkar

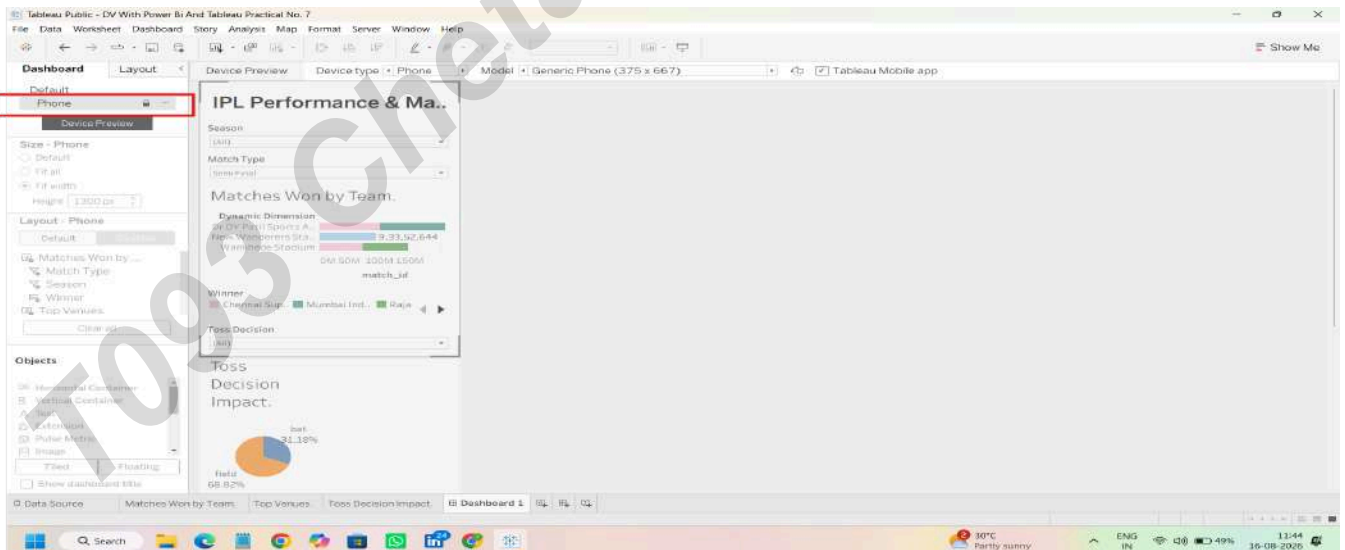

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Step 2:-** In the top device preview bar, select Device type: Phone.  
**2.** Click the Add Phone Layout button on the right side of the preview bar.  
**3.** You will now see a new sub-tab named Phone appear under the Dashboard panel on the left.

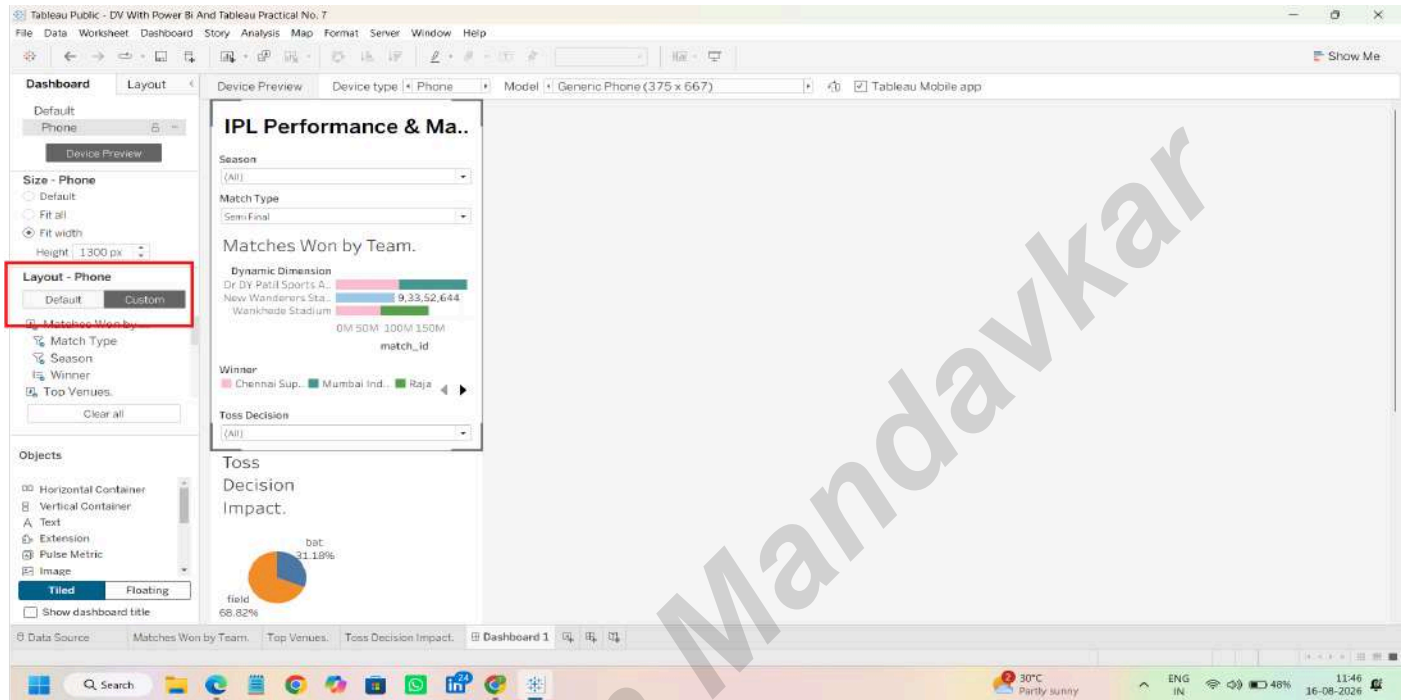

**Name:-** Chetan Mandavkar

**Roll No.** T093

**Subject:-** Data Visualization With Power BI And Tableau

## Sheth L.U.J. And Sir M.V. College

**Step 3:-** In the left panel under the Phone layout section, change Layout from Default to Custom (this allows you to edit the phone layout without affecting your desktop view).

**Step 4:-** Tableau will automatically generate a single-column stack. Arrange the items vertically in logical order:

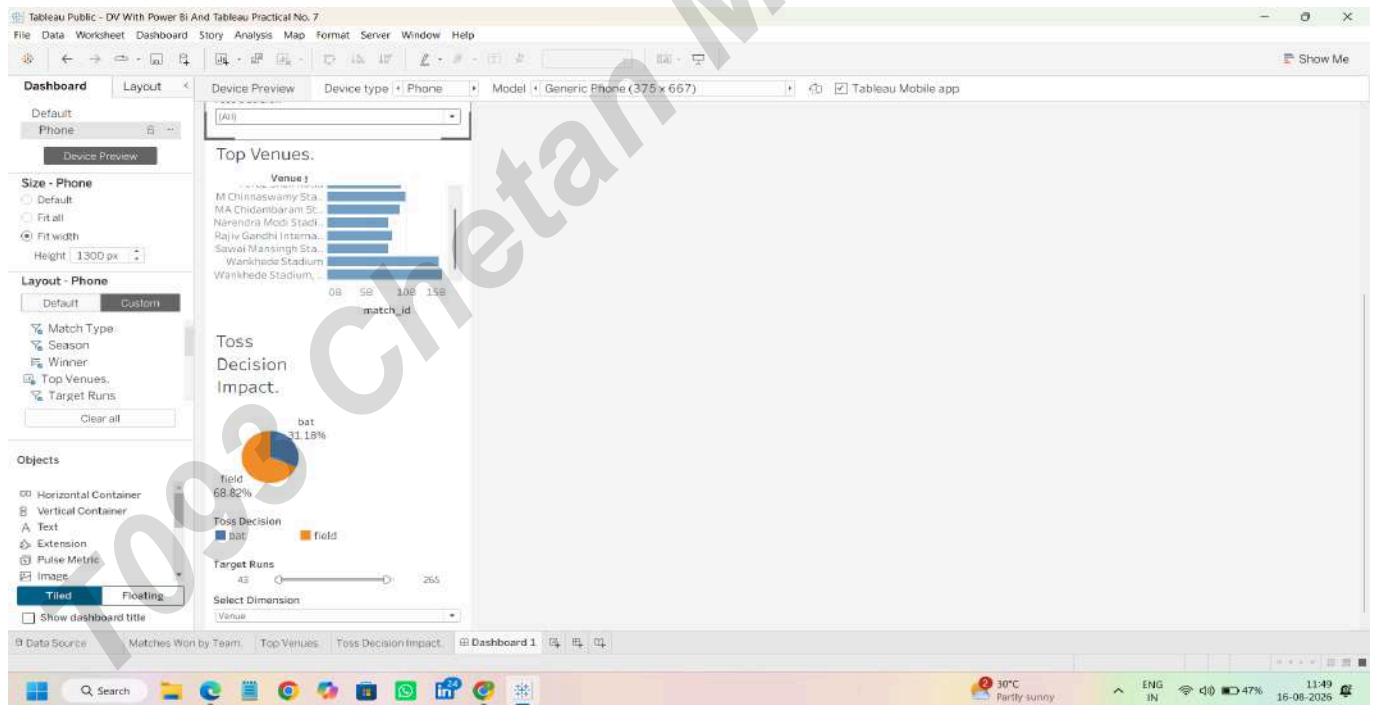

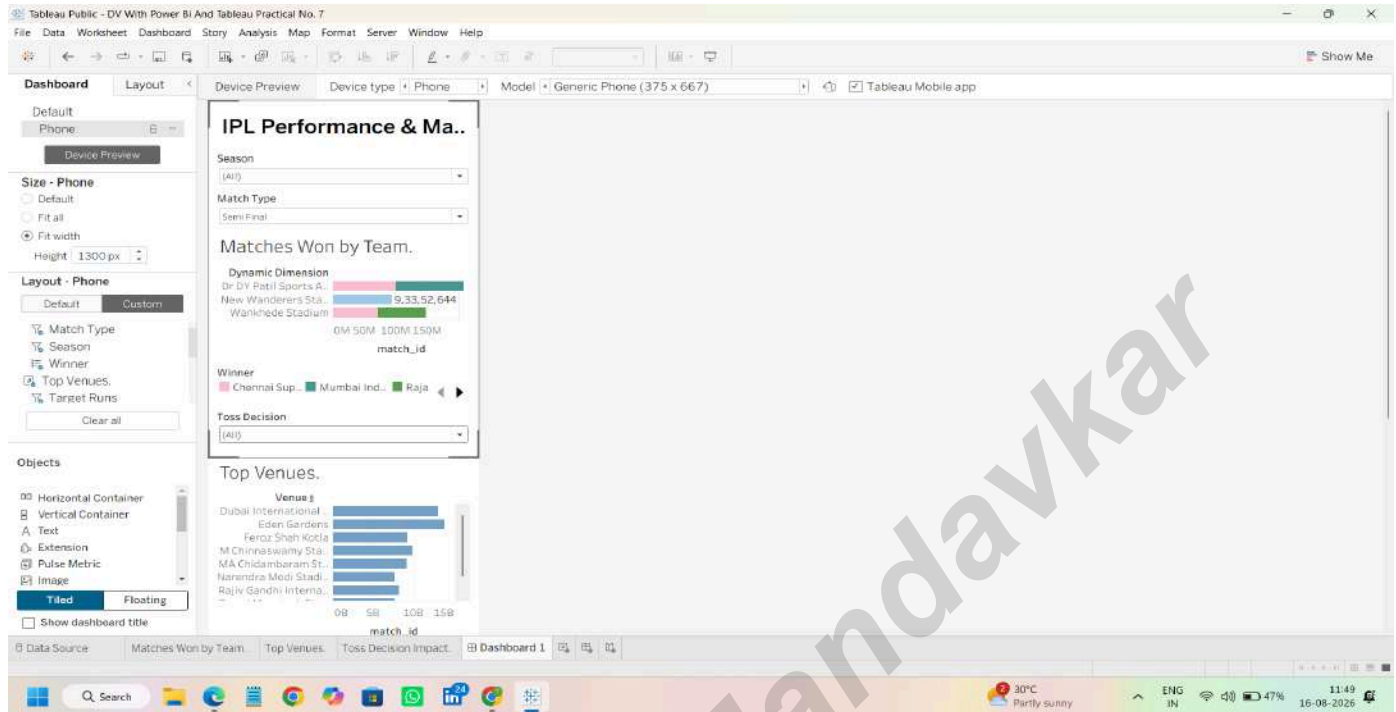

- o Title & Global Filters (Season, Dynamic Dimension parameter) at the top.
- o Matches Won by Team (Primary high-level chart).
- o Top Venues chart below it.
- o Toss Decision Impact pie chart at the bottom.

**Step 5:- Change Device type in the top bar to Tablet.**  
**2. Click Add Tablet Layout.**

**Name:- Chetan Mandavkar**

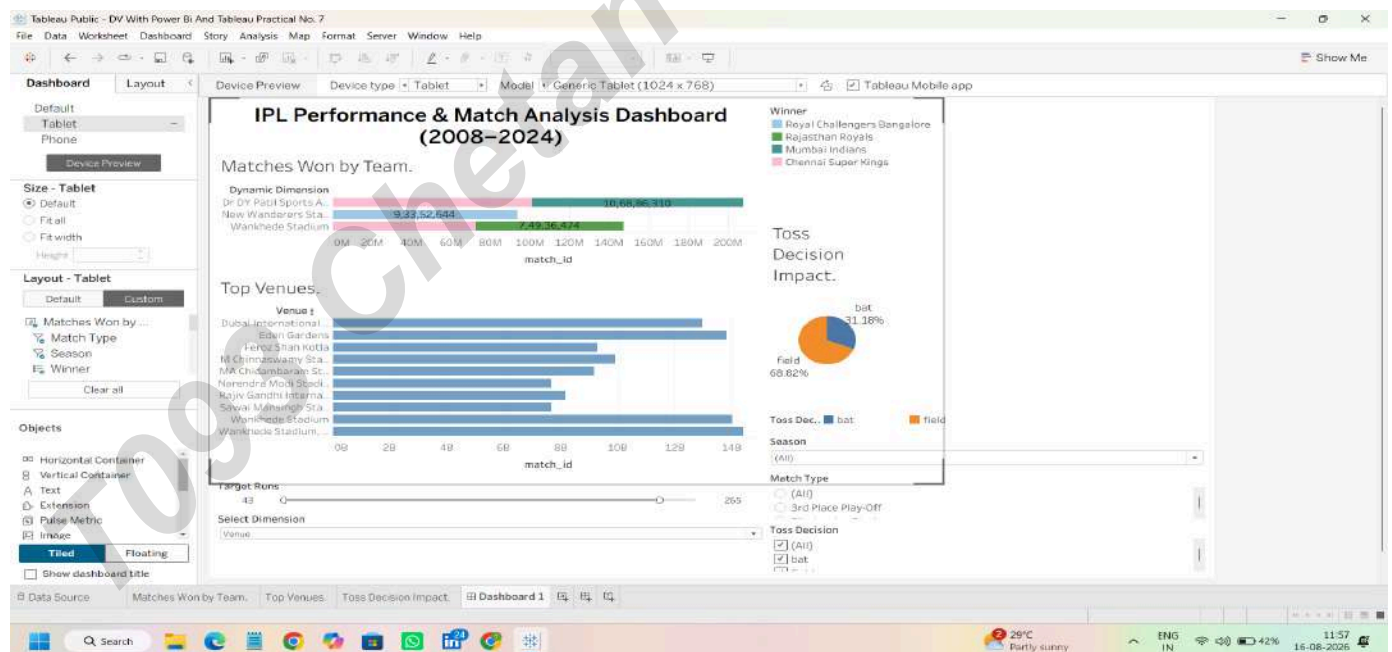

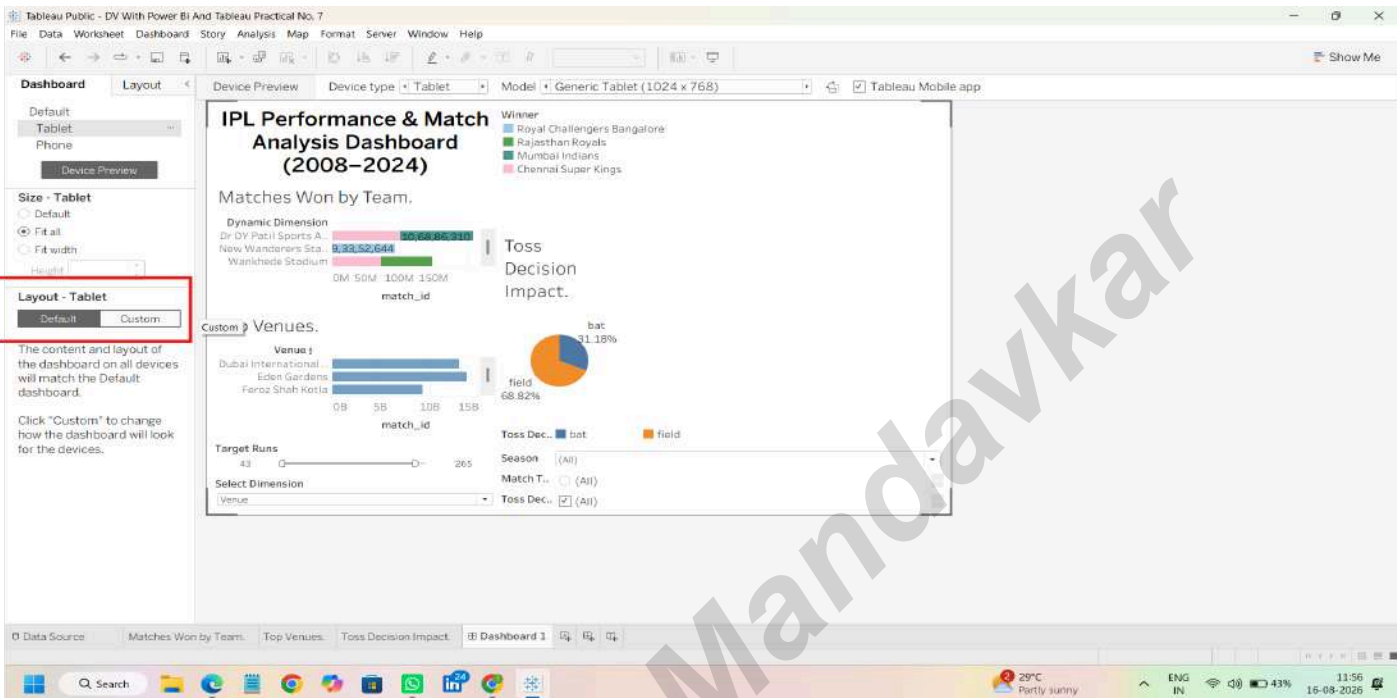

**Roll No. T093**

**Subject:- Data Visualization With Power BI And Tableau**

# Sheth L.U.J. And Sir M.V. College

**Step 6:- Set the layout to Custom and adjust the grid to a 2x2 matrix so all key metrics fit comfortably on an iPad/tablet screen size.**

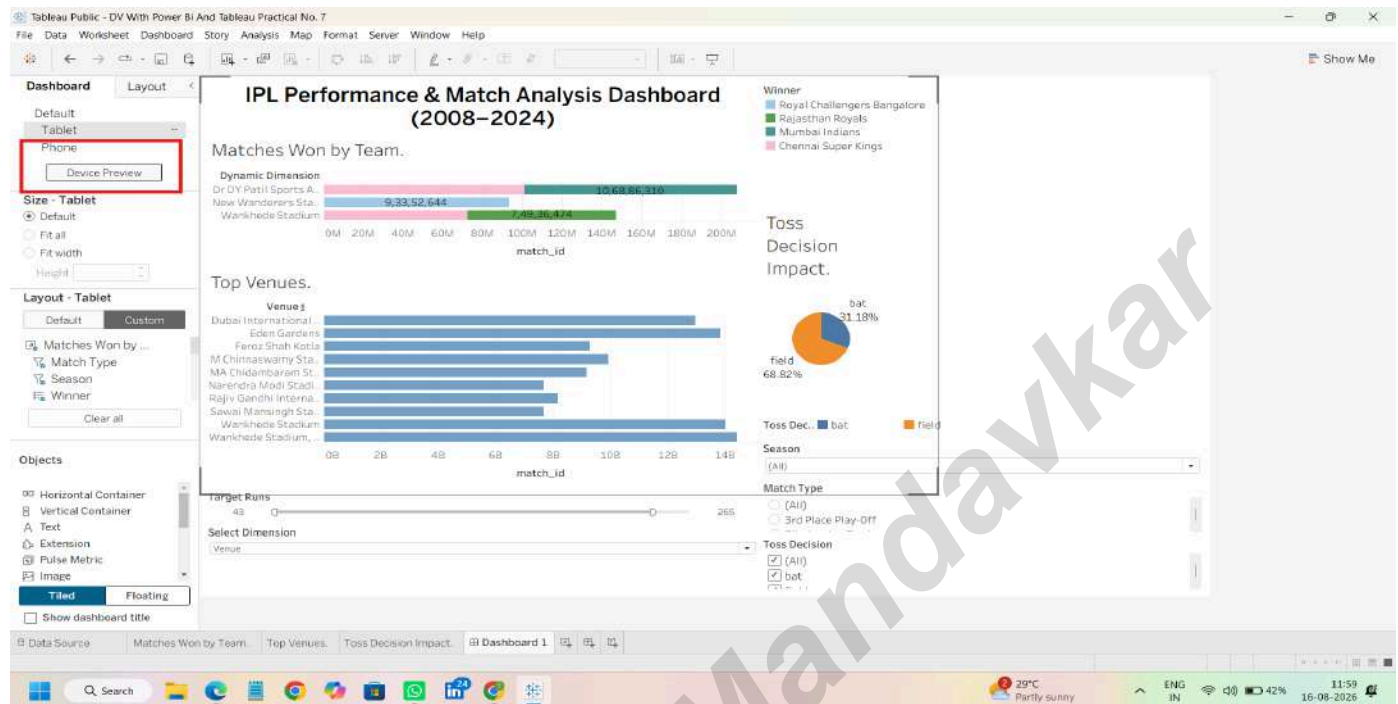

Name:- Chetan Mandavkar

Roll No. T093

Subject:- Data Visualization With Power BI And Tableau

# Sheth L.U.J. And Sir M.V. College

**Click Close on the top Device Preview toolbar when done.**

## G: Build a complete data story using Story feature

**Step 1:-** At the bottom of your Tableau workspace (where your Sheet and Dashboard tabs are), click the New Story tab icon (the notebook icon with a plus sign at the far right).

**2.** Double-click the title heading at the top of the canvas and rename your story to: **IPL Performance & Strategy: Data Story**

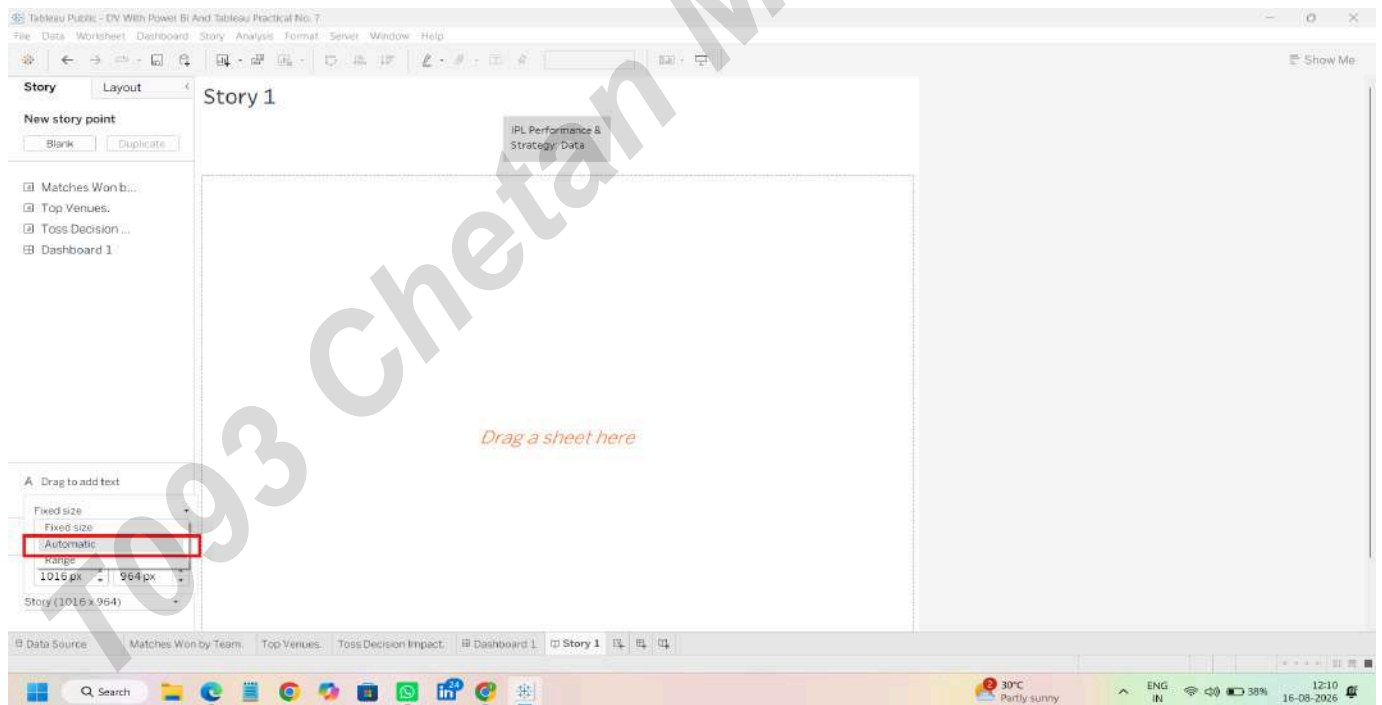

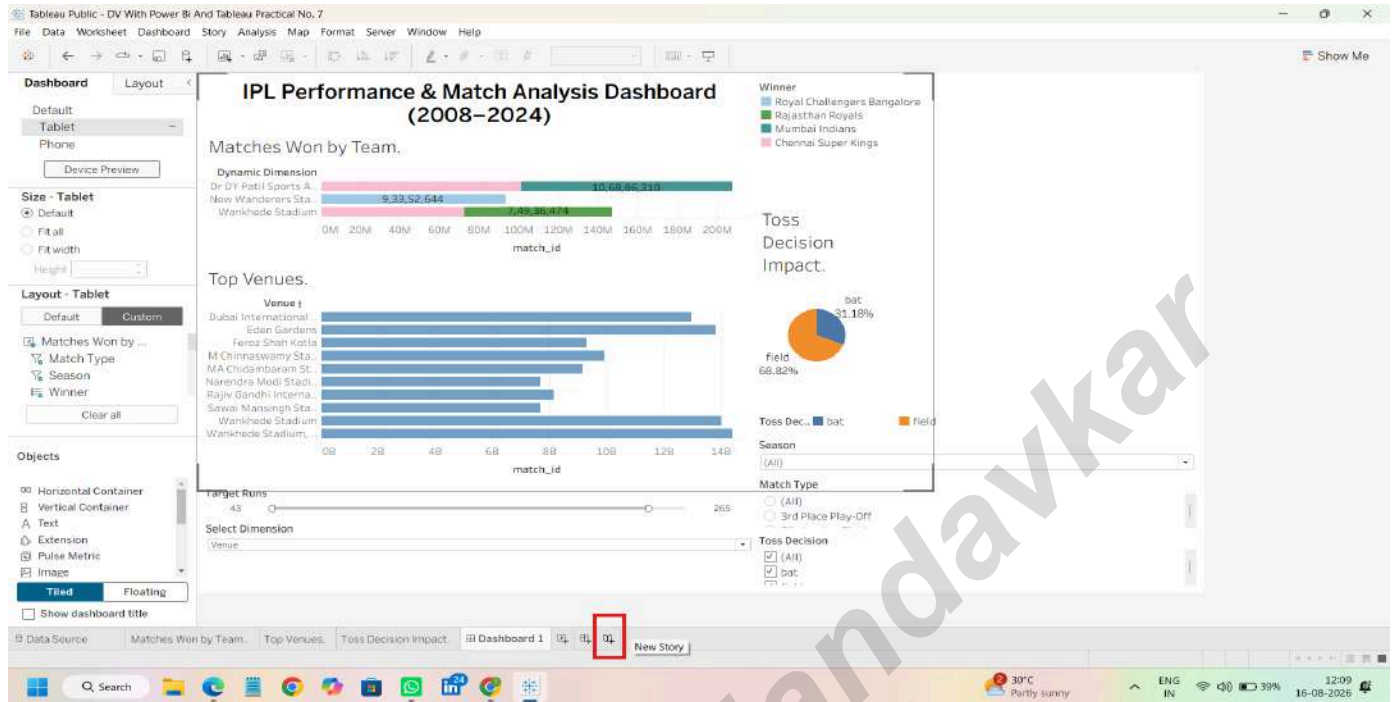

**3.** Set the Story size in the left sidebar under Size to Automatic or Caption Style so it fits your screen nicely.
